FAIRCHILD'S PEPSINE.

The Sustained Supremacy

— OF —

FAIRCHILD'S PEPSINE

In Activity, Permanence and General Excellence has won for this product a wide use and recognition in all the principal markets of the world.

We guarantee it to be unchangeable, to maintain its activity and quality under all commercial conditions ; it is therefore, by far the most available for the dispensing counter, as well as in the manufacture of every proper form of Pepsine preparation.

Under exactly parallel conditions, with any proper percentage of acidity and with any proportion of such acidulated water to the albumen, FAIRCHILD'S PEPSINE is positively superior to any pepsine known.

It will under absolutely comparative conditions, grain for grain, digest more albumen than any other pepsine made.

We will be pleased to send samples to any physician who may wish to ascertain for himself the relative activity of FAIRCHILD'S PEPSINE, or to submit it to any practical trial.

PRICES AND COMPLETE INFORMATION UPON APPLICATION.

FAIRFIELD BROS. & FOSTER,

NEW YORK.

CHICAGO.

LONDON, ENG.

TO CANADIAN PHYSICIANS.

WE have inaugurated a series of Reprints on certain medicated subjects in which

ANTISEPTIC TREATMENT

is advocated, believing they may prove of reciprocal value to physicians and ourselves. The following will be forwarded, postpaid, free of all cost to physicians who have not already received them:

BOARD OF DIRECTORS

SIR DONALD A. SMITH, M.P., K.C.M.G.

(President Bank of Montreal.) Chairman.

Messrs. ROBERT BENNY and JOHN OGILVY.

GEO. E. FENWICK, ESQ., M.D., Medical Officer.

M. M. J. FLANAGAN, Assistant Secretary.

B. HAL. BROWN,

MANAGER FOR CANADA.

DR. SUTTON'S PRIVATE SANATORIUM,
170 RIDGE AVENUE,
ALLEGHENY, PA., U. S. A.

TERRACE BANK SANITORIUM for Women is located at No. 170 Ridge Avenue, Allegheny City, Pa., U. S. A. It is a private institution, owned and managed by Dr. R. S. Sutton, whose residence is adjacent. The location of the institution is on high ground, and overlooks the Allegheny, Monongahela and Ohio rivers. It commands a view of the city of Pittsburgh and its picturesque surroundings.

The building is large and built of stone, brick and slate, for the purpose for which it is used. It is provided with fire-escape, electric bells and telephone. The rooms are commodious, well lighted, and ventilated and heated. The fuel used in open grates, is natural gas.

The house is provided with a private parlor and reading room for patients. The dining room is large and furnished with small tables securing privacy at meals for those who do not care to have meals served in their own rooms.

Patients can be as private and secluded, should they desire it, as in a well appointed hotel.

A competent resident Physician resides in the institution, and none but trained nurses are employed. Churches and Parks are convenient, and the neighborhood is the best the city affords.

TERNS — Room, board, light, fuel, service and nursing, according to location of room and the requirements of the case, from \$15.00 to \$25.00 per week, payable weekly in advance to the Matron.

PROFESSIONAL FEES — A uniform fee of \$15.00 per week is charged every patient, and this fee is payable to the Matron at the end of every second week. Surgical operations are charged for in accordance with the character of the operation, and the ability of the patient to pay.

Indoor friends residing at the institution with invalids are charged at the rate of \$3.00 per day, half price to invalid patients.

If further information is required, please address,

MISS KENNEDY, Matron.

THE SUN

LIFE ASSURANCE COMPANY

OF CANADA.

THOS. WORKMAN,

President.

R. MACAULAY,

Managing Director.

GEO. WILKINS, M.D., M.R.C.S.E.

Chief Medical Officer.

HEAD OFFICE,

MONTRÉAL.

The rapid progress made by this Company may be seen from the following Statement :—

| | INCOME. | ASSETS. | LIFE ASSURANCES IN FORCE. |
|----------|------------------|-------------------|------------------------------|
| 1872.... | \$ 48,210.93.... | \$ 546,491.95.... | \$1,064,350.00 |

HENRY ASPINWALL HOWE, LL.D., Governors' Fellow.
REV. JOHN COOK, D.D., Principal of Morrin College, Quebec.
REV. GEORGE CORNISH, M.A., LL.D., Elective Fellow, Faculty of Arts.

- REV. D. H. MACVICAR, D.D., LL.D., Principal of the Presbyterian College, Montreal.
- JOHN REDPATH DOUGALL, M.A., Representative Fellow in Arts.
- REV. J. CLARK MURRAY, LL.D., Elective Fellow, Faculty of Arts.
- HENRY T. BOVEY, M.A., C.E., Dean of the Faculty of Applied Science.
- BERNARD J. HARRINGTON, B.A., Ph.D., F.G.S., Elective Fellow, Fac. App. Science.
- REV. E. I. REXFORD, B.A., Governors' Fellow.
- REV. JOHN JENKINS, D.D., LL.D., Governors' Fellow.
- REV. CANON HENDERSON, M.A., D.D., (Dublin), Principal of the Montreal Diocesan Theological College.
- REV. GEORGE DOUGLASS, LL.D., Principal of the Montreal Wesleyan Theological College.
- J. S. ARCHIBALD, M.A., D.C.L., Elective Fellow, Faculty of Law.
- GEORGE ROSS, M.A., M.D., Elective Fellow, Faculty of Medicine.
- JOHN S. HALL, B.A., B.C.L., Representative Fellow in Law.
- REV. R. W. NORMAN, M.A., D.C.L., Governors' Fellow.
- S. P. ROBINS, M.A., LL.D., Principal of McGill Normal School.
- FREDERICK W. KELLY, B.A., Ph.D., (Cornell), Representative Fellow in Arts.
- REV. JAMES BARCLAY, M.A., (Glasgow), Governors' Fellow.
- ROBERT CRAIK, M.D., Dean of Faculty of Medicine.
- A. W. BANNISTER, M.A., (Victoria), Principal of St. Francis College.
- THOMAS A. ROGER, M.D., Representative Fellow in Medicine.
- JEFFREY H. BURLAND, B.A.Sc., Representative Fellow in Applied Science.
- MATTHEW HUTCHINSON, B.C.L., Representative Fellow in Law.
- WILFRID T. SKAIFE, B.A.Sc., Representative Fellow in Applied Science.
- REV. WILLIAM M. BARBOUR, D.D., (Yale, U.S.), Principal of the Congregational College of British North America.
- N. W. TRENHOLME, M.A., D.C.L., Dean of the Faculty of Law.
- WESLEY MILLS, M.A., M.D., Representative Fellow in Medicine.

(The Governors, Principal and Fellows constitute, under the Charter, the Corporation of the University, which has the power, under the Statutes, to frame regulations touching Courses of Study, Matriculation, Graduation and other Educational matters; and to grant Degrees.)

OFFICE OF SECRETARY, REGISTRAR AND BURSAR :

[*Acting Secretary of the Royal Institution.*]

- JAMES W. BRACKENRIDGE, B.C.L., Acting Secretary; Office, East Wing McGill College; Residence, 117 Sherer Street.
- SAMUEL R. BURRILL, Clerk, 171 Jacques Cartier Street.
Office hours, 9 to 5.

General Statement.

SESSION OF 1889-90.

The Fifty-seventh Session of the University, being the Thirty-sixth under the amended Charter, will commence in the Autumn of 1889.

By Virtue of the Royal Charter, granted in 1821, and amended in 1852, the Governors, Principal and Fellows of McGill College constitute the Corporation of the University; and, under the Statutes framed by the Board of Governors, with the approval of the Visitor, have the power of granting Degrees in all the Arts and Faculties, in McGill College, and Colleges affiliated thereto.

The Statutes and Regulations of the University have been framed on the most liberal principles, with the view of affording to all classes of persons the greatest possible facilities for the attainment of mental culture and professional training. In its religious character the University is Protestant, but not denominational; and while all possible attention will be given to the character and conduct of students, no interference with their peculiar religious views will be sanctioned.

The educational work of the University is carried on in McGill College, Montreal, and in the affiliated Colleges and Schools.

I.—MCGILL COLLEGE.

THE FACULTY OF ARTS.—The complete course of study extends over four Sessions, of eight months each; and includes Classics and Mathematics, Experimental Physics, English Literature, Logic, Mental and Moral Science, Natural Science, and one Modern Language, or Hebrew. The course of study is, with few exceptions, the same for all students in the first two years; but in the third and fourth years extensive options are allowed, more especially in favour of the Honour Courses in Classics, Mathematics, Mental and Moral Science, Natural Science, English Literature and Modern Languages. Certain exemptions are allowed to professional students. The course of study leads to the Degrees of B.A., M.A., and LL.D.

THE DONALDIA SPECIAL COURSE IN ARTS provides for the education of women, in separate classes, with course of study, exemptions and honours similar to those for men.

THE FACULTY OF APPLIED SCIENCE provides a thorough professional training, extending over three or four years, in Civil Engineering, Mechanical Engineering, Mining Engineering and Assaying, and Practical Chemistry, leading to the Degrees of Bachelor of Applied Science, Master of Engineering, and Master of Applied Science.

THE FACULTY OF MEDICINE.—The complete course of study in Medicine extends over four Sessions, of six months each, and one Summer Session of three months in the third Academic Year, and leads to the Degrees of M.D., C.M.

THE FACULTY OF LAW.—The complete course in Law extends over three Sessions of six months each, and leads to the Degrees of B.C.L. and D.C.L.*

II.—AFFILIATED COLLEGES.

Students of Affiliated Colleges are matriculated in the University, and may pursue their course of study wholly in the Affiliated College, or in part in McGill College, and may come up to the University Examinations on the same terms with the Students of McGill College.

MORRIN COLLEGE, *Quebec*.—Is affiliated in so far as regards Degrees in Arts and Law. (Detailed information may be obtained from Rev. John Cook, D.D., Principal.)

ST. FRANCIS COLLEGE, *Richmond*.—Is affiliated in so far as regards the Intermediate Examinations in Arts. (Detailed information may be obtained from Principal Bannister, B.A., Richmond, P.Q.)

III.—AFFILIATED THEOLOGICAL COLLEGES.

Affiliated Theological Colleges have the right of obtaining for their students the advantage, in whole or in part, of the course of study in Arts, with such facilities in regard to exemptions as may be agreed on, and a number of Free Tuitions are granted by the Board of Governors to the Students of these Colleges when matriculated in Arts.

THE CONGREGATIONAL COLLEGE OF BRITISH NORTH AMERICA, *Montreal*.
REV. WILLIAM M. BARBOUR, D.D., 58 McTavish St.

THE PRESBYTERIAN COLLEGE, MONTREAL, in connection with the Presbyterian Church in Canada. Principal, REV. H. MACVICAR, D.D., LL.D., 69 McTavish St.

THE DIOCESAN COLLEGE OF MONTREAL. Principal, REV. CANON HENDERSON M.A., D.D., 806 Dorchester St.

THE WESLEYAN COLLEGE OF MONTREAL. Principal, REV. GEORGE DOUGLASS, LL.D., 228 University St.

[Calendars of the above Colleges and all necessary information may be obtained on application to their Principals.]

IV.—MCGILL NORMAL SCHOOL.

THE MCGILL NORMAL SCHOOL provides the training requisite for Teachers of Elementary and Model Schools and Academies. Teachers trained in this School are entitled to Provincial Diplomas, and may, on conditions stated in the announcement of the School, enter the classes in the Faculty of Arts for Academy Diploma and for the Degree of B.A. Principal, S. P. RONINS, LL.D., 30 Belmont St., Montreal.

* The complete Calendar, with information respecting all the Faculties, &c., may be obtained of J. W. Breckinridge, Esq., McGill College.

V.—AFFILIATED HIGH SCHOOLS, ETC.

The Trafalgar Institute for the higher education of women, Simpson St., Montreal ; Principal, Miss Grace Fairley. The High School of Montreal, Metcalfe St. ; Principal, H. Aspinwall Howe, LL.D. The Girls' High School of Montreal, Metcalfe St. ; Lady Principal, Mrs. H. H. Fuller. Prince of Wales' College, Charlottetown, P.E.I. ; Bishop's College School, Lennoxville ; St. Francis College School ; Miss Symmers and Smith's School, Montreal ; Eliot School, Montreal ; Girls' High School, St. John, N.B. ; Clarenceville Academy ; Coaticook Academy ; Cowansville Academy ; Dunham Academy ; Gould Model School ; Huntingdon Academy ; Inverness Academy ; Knowlton Academy ; Lachute Academy ; Quebec High School ; Quebec Girls' High School ; Shawville Academy ; Sherbrooke Boys' Academy ; Sherbrooke Girls' Academy ; Stanstead Wesleyan College ; St. John's High School ; Sutton Academy ; Three Rivers Academy ; Waterloo Academy ; Waterville Academy.

Faculty of Medicine.

SIR WILLIAM DAWSON, C.M.G., LL.D., F.R.S., Principal and Professor of Natural History.

ROBERT CRAIK, M.D., Dean of the Faculty and Professor of Hygiene and Public Health.

EMERITUS PROFESSORS.

WILLIAM WRIGHT, M.D., *Materia Medica*, 84 St. Famille Street.

DUNCAN C. MACCALLUM, M.D., *Midwifery*, 45 Union Avenue.

PROFESSORS.

G. E. FENWICK, M.D., Professor of Surgery, 2356 St. Catherine Street.

G. P. GIRDWOOD, M.D., Professor of Chemistry, 54 Beaver Hall Hill.

GEORGE ROSS, M.A., M.D., Professor of Medicine, 49 Union Avenue.

THOMAS G. RODDICK, M.D., Professor of Clinical Surgery, 80 Union Avenue.

WILLIAM GARDNER, M.D., Professor of Gynaecology, 109 Union Avenue.

FRANCIS J. SHEPHERD, M.D., Professor of Anatomy and Librarian of the Faculty, 152 Mansfield Street.

FRANK BULLER, M.D., Professor of Ophthalmology and Otology, 838 Dorchester Street.

AMES STEWART, M.D., Professor of Pharmacology and Therapeutics, and Registrar of the Faculty, 939 Dorchester Street.

GEORGE WILKINS, M.D., Professor of Medical Jurisprudence, and Lecturer on Histology, 898 Dorchester Street.

D. P. PENHALLOW, B.Sc., Professor of Botany.

K. L. MACDONNELL, B.A., M.D., Professor of Clinical Medicine, 117 Metcalfe Street.

WILFRID MILLS, M.A., M.D., Professor of Physiology, McGill College.

JAMES C. CAMERON, M.D., Professor of Midwifery and Diseases of Infancy 941 Dorchester Street.

DEMONSTRATORS, INSTRUCTORS, &c.

R. L. RUELLAN, B.A., M.D., Lecturer on Chemistry, McGill College.

WILLIAM R. SUTHERLAND, M.D., Assistant Demonstrator of Anatomy, and Curator of the Museum, 764 Sherbrooke Street.

GEORGE W. MAIOR, B.A., M.D., Instructor in Laryngology, 82 Union Avenue.

ALFRED D. BLAVERDIER, B.A., M.D., Instructor in Diseases of Children, 70 Beaver Hall Hill.

WYATT G. JOHNSTON, M.D., Demonstrator of Pathology, McGill College.

JAMES BELL, M.D., Assistant to the Chair of Clinical Surgery, 53 Union Avenue.

T. JOHNSON ALLOWAY, M.D., Instructor in Gynaecology, 23 Mackay Street.

F. G. LINLEY, M.D., Assistant Demonstrator of Anatomy, 801 Dorchester St.

BENEFACATORS OF THE

Faculty of Medicine.

I.—LEANCHOIL ENDOWMENT.

| | |
|------------------------------------|----------|
| Sir Donald A. Smith, K.C.M.G. | \$50,000 |
|------------------------------------|----------|

II.—CAMPBELL MEMORIAL ENDOWMENT.—\$63,000

Established to commemorate the services rendered to the Faculty during forty years by the late Dean, George W. Campbell, M.D., LL.D.

Autopsies are performed at the General Hospital between 12 a.

**FACULTY OF MEDICINE - MCILLIVRAY
PLAN SECOND FLOOR.**

FACULTY OF MEDICINE—MCGILL UNIVERSITY.

Faculty of Medicine.

THE PRINCIPAL (ex officio), SIR WM. DAWSON.

Professors:

| | | |
|------------|-----------|-------------|
| WRIGHT, | ROSS, | WILKINS, |
| MACCALLUM, | RODDICK, | PENHALLOW, |
| CRAIK, | GARDNER, | MACDONNELL, |
| FENWICK, | SHEPHERD, | MILLS, |
| GIRDWOOD, | BULLER, | CAMERON, |
| | STEWART. | |

Dean.—ROBERT CRAIK, M.D.

Vice-Dean.—GEO. ROSS, M.D.

Registrar.—J. STEWART, M.D.

Librarian.—F. J. SHEPHERD, M.D.

The Fifty-seventh Session of the Faculty will be opened on Tuesday, October 1st, 1889, by an introductory lecture at 3 p.m. The regular lectures will begin on October 2nd, at the hours specified in the time table, and will be continued for six months.

The Medical School of McGill University was founded in 1824 as the "Medical Institution" by Drs. John Stephenson, Andrew F. Holmes, William Robertson and William Caldwell. In 1829 the Medical Institution became the Medical Faculty of McGill College. There were no Sessions during the political troubles from 1836 to 1839, and it is owing to this gap that the present is the fifty-seventh Session of the Faculty. In reality this is the sixty-first Session of the School, which is the direct continuation of the Medical Institution.

The new building of the Medical Faculty, which was opened in the year 1885, is one of the most complete structures of its kind on this continent or elsewhere. It has been found admirably adapted for the fulfilment of the great aim of the Faculty—to make the teaching of the primary branches as practical and as thorough as possible. The facilities now possessed by the Faculty for the above purpose are equal to those of the most advanced European medical schools.

Through the great liberality of Sir Donald A. Smith in founding the "Leanchoil Endowment," and of the citizens of Montreal and Medical Graduates in subscribing to the "Campbell Memorial Fund," the Faculty are enabled to conduct and maintain the teaching of the different branches in a high state of efficiency.

Laboratories, &c.

In addition to the laboratories and dissecting room, there are two large lecture rooms, each capable of comfortably seating 300 students, and one small demonstration room for classes of 50 and under. The space allotted to the library and museum has been largely increased. A large reading room, with waiting and cloak rooms, have been provided for students.

Dissecting Room.

The Dissecting Room, which is situated on the second floor, is 76 feet in length and 31 feet in breadth. It is furnished with twenty tables, and is well lighted for work during the day and night. In procuring appliances for the comfort and convenience of the students, no reasonable expense has been spared.

In connection with the dissecting room, there is a "Bone room," where students have an excellent opportunity of studying osteology. There are also two distinct rooms for the demonstrators of anatomy.

Physiological Laboratory.

The Physiological Laboratory, which is situated on the ground floor, is supplied with the most modern apparatus for the practical teaching of this most important branch of the medical curriculum. It contains amongst other valuable instruments: kymographs, various manometers, &c., for demonstrating blood pressure; myographs, rheographs, moist chambers, &c., and various electrical appliances for demonstrating experiments in connection with nerve and muscle; special apparatus for illustrating various points in respiration; apparatus specially suitable for demonstrating the processes of digestion, as well as the chemical composition and nature of the secretions, and the chief constituents of the tissues and nutritive fluids. The laboratory is arranged in such a way as to permit of students assisting at, and taking part in, these demonstrations. During the past session important additions have been made to the apparatus of the physiological laboratory.

Histological Laboratory.

The Histological Laboratory is a large, well lighted room on the second floor. It is so arranged that over eighty students can be present at the microscopical demonstrations. For this purpose it is supplied with thirty-five microscopes, all from the well-known makers, Zeiss, Hartnack and Leitz. From the large number of microscopes employed, students will have special facilities in studying and making themselves thoroughly acquainted with the specimens that are the subjects of demonstration.

Pharmacological Laboratory.

The Pharmacological Laboratory is a large room situated on the ground floor, and is now furnished with the necessary appliances for the practical teaching of pharmacy. It is hoped that before another session passes away, the apparatus necessary for the demonstration of the more important actions of many drugs will be in possession of the Faculty.

Chemical Laboratory.

The Chemical Laboratory is large, lofty, and well lighted, and can accommodate comfortably 76 men at one time. Each student, when entering on this course, has a numbered table in the laboratory assigned to him for his use during the session. Each table has its own gas and water fixtures, and is provided with shelves for its corresponding set of reagent-bottles, as well as a drawer and locker containing a modern set of chemical apparatus especially adapted for the work. This apparatus is provided by the Professor of Chemistry, and supplied to each student without extra charge. The student is only required to pay for apparatus broken or destroyed.

The laboratory is furnished with a large draught closet for ventilation, sulphuretted hydrogen apparatus, gas and combustion furnaces, &c., giving to the student unsurpassed advantages for acquiring a sound and practical knowledge of medical chemistry.

Pathological Laboratory.

In the Pathological Laboratory accommodation will be provided for students or practitioners who desire to carry on private pathological research.

The recent additions made to the laboratory include a suite of rooms exclusively devoted to the study and culture of Bacteria, furnished with a complete outfit of the best modern apparatus for this purpose, including sterilizer, thermostat, &c., &c.

The demonstrations in Morbid Anatomy will be given in a small laboratory specially arranged for the work.

The classes in Pathological Histology will be held in the Histological Laboratory.

The class tickets for the various courses are accepted as qualifying candidates for examination before the various Colleges and Licensing bodies of Great Britain and Ireland, and the College of Physicians and Surgeons of Ontario. The degree in Medicine of this University carries with it at the Licensing Boards of Great Britain the same exemptions in certain subjects as are granted to all colonial degrees.

To meet the circumstances of the General Practitioners in British North America, where there is no division of the profession into Physicians and Surgeons exclusively, the degree awarded upon graduation is that of "Doctor of Medicine and Master of Surgery," in accordance with the general nature and character of the curriculum, as fully specified hereafter. The degree is received by the College of Physicians and Surgeons of the Province of Quebec.

I.

MATRICULATION.

It is very important that intending Students should bear in mind the following :—

(1.) *If residents of Ontario, and desirous of obtaining the license of that Province, they must conform to the regulations regarding the Preliminary Examination, and register before beginning their medical studies.* (See page 26.)

(2.) *If residents of the Province of Quebec, and desirous of obtaining the license of that Province, they must pass the Matriculation Examination of the Quebec Medical Board before beginning their medical studies.* (See page 25.)

In the event of a resident in the Province of Quebec producing a Certificate of Matriculation from any of the other Provinces of the Dominion he will be required to make a declaration that he had not obtained it with the object of avoiding the examination of the Quebec Medical Board.

(3.) *Residents of the Maritime Provinces, Manitoba, or British Columbia may either pass the Preliminary Examination of their respective Medical Boards or the Matriculation Examination of this University.*

(A).—UNIVERSITY MATRICULATION EXAMINATION.

The Preliminary Examinations in General Education of the following Bodies is accepted by the University in lieu of its own Matriculation Examination :—

1. The College of Physicians and Surgeons, Ontario.
2. The College of Physicians and Surgeons, Quebec.
3. The New Brunswick Medical Board.
4. The Nova Scotia Medical Board.
5. The Manitoba Medical College.

Graduates and Matriculates in Arts of all recognized Universities are exempt from matriculation. Any student who is unable to present proof of having passed any one of the above or other equally satisfactory examination, will be required to undergo the matriculation examination either in Arts or Medicine of this University.

The matriculation in Arts is held twice yearly : on the 1st of June and following days, and on the 16th of September and following days.

The subjects for examination are Classics, Mathematics and English.

Greek.—Xenophon, *Anabasis*, Book I.; Greek Grammar.

Latin.—Caesar, *Bell. Gall.* Book I.; and Virgil, *Aeneid*, Book I. lines 1-300; Latin Grammar.

Mathematics.—Arithmetic; Algebra, to simple equations (inclusive); Euclid's Elements, Books I., II., III.

English.—Writing from Dictation. A paper on English Grammar, including *Analysis*. A paper on the leading events of English history. Essay on a subject to be given at the time of the examination.

An equivalent amount of other books or other authors in Latin or Greek than those named may be accepted by the Examiners, on application made through the Professor of Classics.

The Medical Matriculation Examination is the same as that required by the Medical Council of Great Britain.

Examinations in conformity therewith will be held on the last Friday and Saturday in March and the last Friday and Saturday in September of each year. Applications may be made to Dr. Howe, the Examiner till the evening of the previous day. The requirements of the standard for Matriculation are:—(1) English Language, including Grammar and Composition.* (2) English History. (3) Modern Geography. (4) Latin, including Translation from the original and Grammar. (5) Elements of Mathematics, comprising (a) Arithmetic, including Vulgar and Decimal Fractions; (b) Algebra, including simple Equations; (c) Geometry, including the first two books of Euclid or the subjects thereof. (6) Elementary Mechanics of Solids and Fluids, comprising the elements of Statics, Dynamics and Hydrostatics. (7) One of the following optional subjects:—(a) Greek, (b) French, (c) German, (d) Italian, (e) any other modern language, (f) Logic, (g) Botany, (h) Elementary Chemistry.

* The ability of the candidate will be fully tested in the following;—“(1) To write a sentence in English on a given theme, attention being given to spelling and punctuation as well as to composition; (2) to write correctly from dictation; (3) to explain the grammatical construction of sentences; (4) to point out the grammatical errors in sentences ungrammatically composed, and to explain their nature; and (5) to give the derivation and definition of English words in common use.”

TEXT-BOOKS—Latin: Cicero, in Catalinam I.; or Virgil, *Æneid*, Bk. I.

GREEK.—Xenophon, *Anabasis*, Bk. I., or Homer's *Iliad*, Bk. IV.

FRENCH.—Voltaire's *Charles XII.*, Books I. and II.

NATURAL PHILOSOPHY.—Ganot's *Physics*, Books I., II. and III.

BOTANY.—Gray's “How Plants Grow.”

ELEMENTARY CHEMISTRY.—Storer and Elliott's *Manual*.

(B).—**MATRICULATION EXAMINATION**

OF THE

COLLEGE OF PHYSICIANS AND SURGEONS OF QUEBEC.

LATIN.—Cæsar's *Commentaries*, Bks. I., II., III., IV., V.—Virgil's *Æneid*, Bks. I. and II.—The *Odes of Horace*, Bk. III.

ENGLISH.—Sprague's “Six Selections from Washington Irving's Sketch Book.”—A play of Shakespeare, viz., “*Coriolanus*” for 1889, and “*Richard III.*” for 1890.

FRENCH.—Fénélon's “*Aventures de Télémaque*.”—A French play, viz., Molière, “*Le Bourgeois Gentilhomme*” and La Fontaine's “*Fables*,” Books I., II., III., for 1889 and 1890.

BELLES LETTRES AND RHETORIC.—Principles of the subject. History of the Literature of the age of Pericles in Greece, of Augustus in Rome, of Elizabeth in England, Louis XIV. in France, and of the 17th and 18th centuries of both countries.

HISTORY.—Outlines of the History of Greece and Rome, with particular knowledge of England, France and Canada.

GEOGRAPHY.—A general view, with particular knowledge of England, France and North America.

ARITHMETIC.—Must include Vulgar and Decimal Fractions, Simple and Compound Proportion, Interest and Percentages, and Square Root.

ALGEBRA.—Must include Fractions and Simultaneous Equations of the First Degree.

GEOMETRY.—Euclid, Books I., II., III., IV. and VI., or the portion of Plane Geometry covered by those Books. Also the measurement of the lines, surfaces and volumes, of regular geometrical figures.

OPTIONAL SUBJECTS.

GREEK.—Xenophon's *Anabasis*, Book I.—Homer's *Iliad*, Book I.

PHYSICS.—Outlines of the subject, as in Ganot's *Physics*, translated by Atkinson.

PHILOSOPHY.—Elements of Logic and of Moral Philosophy, as in Jevon's *Logic* and Calderwood's *Hand-book of Moral Philosophy*.

The Examinations will be held upon the 19th of September, 1889, at Quebec, and on the 4th of May, 1890, at Montreal. Applications to be made to Dr. F. W. Campbell, Montreal, or Dr. Belleau, Quebec, either of whom will furnish schedule giving text books and percentage of marks to be obtained.

Examination Fee, ten dollars. Should the candidate be unsuccessful, one half of the fee will be returned.

Of the four years' study *after* having passed the Matriculation Examination, three six months' sessions, at least, must be attended at a University, College, or Incorporated School of Medicine, recognized by the "Provincial Medical Board." The first session must be attended during the year immediately succeeding the Matriculation Examination, and the final session must be in the fourth year.

(c).—MATRICULATION EXAMINATION

OF THE

COLLEGE OF PHYSICIANS AND SURGEONS OF ONTARIO.

On and after July 1st, 1888, every one desirous of being registered as a Matriculated Medical Student in the Register of this College, except as hereinafter provided, must present to the Registrar, Dr. Pyne, Toronto, the official certificate of having passed the 2nd class Teachers' examination with Latin option; whereupon he shall be entitled to be so registered upon the payment of twenty dollars and giving proof of his identity.

Graduates in Arts, or Students having matriculated in Arts in any University in Her Majesty's Dominions are not required to pass the Matriculation Examination, but may register their names with the Registrar of the College, upon giving satisfactory evidence of their qualifications and upon paying the fee of twenty dollars.

II.

ENREGISTRATION.

The following are the University Regulations:—

All Students desirous of attending the Medical Lectures shall, at the commencement of each Session, enrol their names and residences in the Register of the Medical Faculty.

The said Register shall be closed on the last day of October in each year. Fees are payable to the Registrar, and must be paid in advance (except under special circumstances) at the time of enregistration.

Enregistration in the Summer Session is compulsory upon all Students, whether attending one or more of the classes.

III.

COURSES OF LECTURES.

ANATOMY.

(DESCRIPTIVE AND PRACTICAL).

PROFESSOR FRANCIS J. SHEPHERD.

JOHN STEPHENSON, 1824.

WILLIAM E. SCOTT, 1856.

OLIVER T. BRUNEAU, 1842.

FRANCIS J. SHEPHERD, 1883.

Anatomy is taught in the most practical manner possible, and its relation to Medicine and Surgery fully considered. The lectures are illustrated by the fresh subject, moist and dry preparations, sections, models and plates, and drawings on the blackboard.

The department of *Practical Anatomy* is under the direct control and personal supervision of the Professor of Anatomy, assisted by his staff of Demonstrators.

The methods of teaching are similar to those of the best European schools, and Students are thoroughly grounded in this branch.

Every Student must be examined *at least* three times in each part dissected, and no certificate is given unless the examinations are satisfactory.

Special Demonstrations on the Brain, Thorax, Abdomen, Bones, &c., are frequently given. Prizes are awarded at the end of the Session for the best examination on the fresh subject.

The Dissecting Room is open from 8 a.m. to 10 p.m. Abundance of material provided.

CHEMISTRY.

PROFESSOR GILBERT P. GIRDWOOD.

LECTURER, R. F. RUTTAN.

ANDREW F. HOLMES, 1824.

WILLIAM SUTHERLAND, 1849.

ARCHIBALD HALL, 1842.

ROBERT CRAIK, 1867.

GILBERT P. GIRDWOOD, 1879.

Inorganic Chemistry is fully treated; a large portion of the course is devoted to Organic Chemistry and its relations to Physiology. The branches of Physics bearing upon or connected with Chemistry also engage the attention of the Class. For experimental illustration abundant apparatus is possessed by the College.

The Chemical Laboratory will be open to members of the class to repeat experiments performed during the course, under the superintendence of the Professor or Lecturer.

PRACTICAL CHEMISTRY.

PROFESSOR GILBERT P. GIRDWOOD.

LECTURER, R. F. RUTTAN.

The course in practical chemistry includes two hours' laboratory work three times a week for three months. The Students are instructed individually in chemical manipulations, blow-pipe analysis, and qualitative determination of the salts, acids, &c., they will require to use in practice. They are required before finishing their course to be familiar with the principles of practical Forensic and Sanitary Chemistry. Special attention is directed to instructing the Student

in making accurate notes of his experiments and his conclusions. These notes are examined daily and criticised.

PHYSIOLOGY.

PROFESSOR WESLEY MILLS.

JOHN STEPHENSON, 1824.

WILLIAM FRASER, 1849.

STEPHEN C. SEWELL, 1842.

JOSEPH M. DRAKE, 1872.

ROBERT L. MACDONNELL, 1845.

WILLIAM OSLER, 1874.

WESLEY MILLS, 1886.

The purpose of this Course is to make Students thoroughly acquainted, as far as time permits, with modern Physiology: its methods, its deductions, and the basis on which the latter rest. Accordingly a full course of lectures is given, in which both the Experimental and Chemical departments of the subject receive attention.

In addition to the use of diagrams, plates, models, &c., every department of the subject is experimentally illustrated. The experiments are free from elaborate *technique*, and many of them are of a kind susceptible of ready imitation by the Student.

Laboratory work for Senior Students:—

(1.) During the first part of the Session there will be a course on Physiological Chemistry, in which the Student will, under direction, investigate food stuffs, digestive action, blood, and the more important secretions and excretions, including urine. All the apparatus and material for this course will be provided.

(2.) The remainder of the Session will be devoted to the performance of such experiments as are unsuitable for demonstration to a large class in the lecture room, and such as require the use of elaborate methods, apparatus, &c.

HISTOLOGY.

PROFESSOR GEO. WILKINS.

This will consist of a course of ten lectures and twenty-five weekly demonstrations with the Microscope, besides a short course in the preparation and mounting of specimens. As the demonstrations will

be chiefly relied upon for teaching the Microscopic Anatomy of the various structures, the specimens under observation will then be minutely described. Plates and diagrams specially prepared for these lectures will be freely made use of.

PHARMACOLOGY AND THERAPEUTICS.

PROFESSOR JAMES STEWART.

ANDREW F. HOLMES, 1824.

A. HALL, 1849.

ARCHIBALD HALL, 1835.

WILLIAM WRIGHT, 1854.

STEPHEN C. SEWELL, 1842.

JAMES STEWART, 1883.

The course on this subject comprises :

I. A description of the Pharmacology and Therapeutics of the more important medicinal agents.

II. The delivery of a weekly lecture (" Clinical Therapeutics ") in the theatre of the General Hospital on some case or groups of cases well adapted for illustrating important points in both general and special Therapeutics. The material for these lectures is abundant, being obtained from both the wards and the out door clinics. Electro Therapeutics will also be dealt with in this part of the course.

III. The attendance during the summer session of a course on Practical Materia Medica.

MEDICINE.

PROFESSOR GEORGE ROSS.

WILLIAM CALDWELL, 1824.

ANDREW F. HOLMES, 1842.

WILLIAM ROBERTSON, 1833.

R. PALMER HOWARD, 1860.

GEORGE Ross, 1889.

While the lectures on this subject are mainly devoted to Special Pathology and Therapeutics, no opportunity is lost of illustrating and explaining the *general* laws of disease. With the exception of certain affections seldom or never observed in this country, all the important internal diseases of the body, except those peculiar to Women and children, are discussed, and their Pathological Anatomy illustrated by the large collection of morbid preparations in the University Museum, and by fresh specimens contributed by the Demonstrator of Morbid Anatomy.

The College possesses an extensive series of Anatomical plates

illustrative of the Histological and Anatomical appearances of disease, and the wards of the General Hospital afford the lecturer ample opportunities to refer to living examples of very many of the maladies he describes, and to give the results of treatment.

CLINICAL MEDICINE.

PROFESSOR R. L. MACDONNELL.

| | |
|--------------------------------|-----------------------------|
| JAMES CRAWFORD, 1845 and 1852. | DUNCAN C. MACCALLUM, 1860 |
| ROBT. L. MACDONNELL, 1849. | JOSEPH M. DRAKE, 1868. |
| STEPHEN C. SEWELL, 1850. | GEORGE ROSS, 1872. |
| R. PALMER HOWARD, 1856. | RICH'D L. MACDONNELL, 1889. |

Attendance is given in the Medical Wards of the Montreal General Hospital on three days of every week with the 3rd year students, and three days with those of the 4th year. Accurate reports of all cases are kept by duly appointed clinical clerks, and are systematically read before the class. Instruction is given at the bedside, and special inducements are offered to every pupil to take part in the physical examination of patients. The mode of conducting investigations, the use of the microscope, the value of the thermometer and ophthalmoscope, &c., in medical diagnosis, are all explained and illustrated. Senior Students are called upon in rotation to examine new cases before the class, and to be examined thereon as to their general knowledge. In addition, one weekly Clinical Lecture is delivered, bearing upon some case or cases of importance which may happen to be under observation at the time. Special attention is directed to Medical Anatomy, and candidates for the degree will be examined thereon.

SURGERY.

PROFESSOR GEO. E. FENWICK.

| | |
|------------------------|------------------------|
| JOHN STEPHENSON, 1824. | G. W. CAMPBELL, 1835. |
| | GEO. E. FENWICK, 1875. |

The first part of this course consists of Surgical Pathology, illustrated by a large collection of preparations from the College Museum, also specimens as they are obtained from cases under observation at the Hospital, and contributed to that collection by the Hospital pathologist and from private sources. The second part of the course is devoted to the practice of Surgery, in which attention is drawn to cases which have been observed by the class during

the previous summer session. The various surgical appliances are exhibited, and their uses and application explained. Surgical Anatomy and Operative Surgery form a special department of this course, and Quain's and Macleise's plates are used in illustration.

CLINICAL SURGERY.

PROFESSOR THOMAS G. RODDICK.

JAMES CRAWFORD, 1845.

ROBERT CRAIK, 1860.

WILLIAM E. SCOTT, 1852.

GEORGE E. FENWICK, 1867.

DUNCAN C. MACCALLUM, 1856.

THOMAS G. RODDICK, 1875.

This course is eminently practical, consisting of bedside instruction and lectures delivered weekly, illustrative of surgical cases actually present in the wards of the General Hospital. The class is separated into junior and senior divisions which are taken charge of by the Professor on alternate days, when the reports of the Clinical clerks are read and criticised, and fresh cases are examined by the senior students. The surgical dressings are, as much as possible, reserved for these occasions, so as to give all present an opportunity of participating in the application of splints to fractures, dressing of wounds, minor operations, &c. Major operations are performed in the theatre attached to the Hospital, which is so constructed that the most distant can obtain a fair view of the operations. All the recently invented appliances for the treatment of surgical disease have been introduced into the Hospital.

MIDWIFERY.

PROFESSOR J. C. CAMERON.

WILLIAM ROBERTSON, 1824.

ARCHIBALD HALL, 1854.

JOHN RACE, 1833.

DUNCAN C. MACCALLUM, 1868.

GEO. W. CAMPBELL, 1835.

ARTHUR A. BROWNE, 1883.

MICHAEL McCULLOCH, 1842.

J. C. CAMERON, 1886.

This course will embrace: 1. Lectures on the principles and practice of the obstetric art, illustrated by diagrams, fresh and preserved specimens, the artificial pelvis, complete set of models illustrating deformities of the pelvis, wax preparations, bronze mechanical pelvis, &c. 2. Bedside instruction in the Montreal Maternity, including external palpation, pelvimetry, the management and after-treatment of cases. 3. A complete course on obstetric operations with the phantom and preserved foetuses. 4. The Diseases of Infancy.

5. A course of individual clinical instruction at the Montreal Maternity.

Arrangements have now been made for a graded course in Obstetrics, instruction being given separately to third year and final students.

GYNÆCOLOGY.

PROFESSOR WM. GARDNER, 1883.

The course on this subject will comprise two lectures a week throughout the session. The anatomy and physiology of the parts concerned will be first discussed. Then the various methods of examination will be fully described, the necessary instruments exhibited, and their uses explained. After this, the diseases peculiar to the sex will be considered as fully as time will permit, in the following order:—Disorders of Menstruation; Leucorrhœa, its causes and treatment; Pelvic Cellulitis and Peritonitis; Lacerations of the Cervix Uteri and Perineum; Urinary and Fæcal Fistulæ; Inflammations of the Uterus; Displacements of the Uterus; Tumors of the Uterus: Diseases of the Ovaries.

The lectures will be illustrated as fully as possible by drawings and morbid specimens. The Gynæcological Clinic of the General Hospital furnishes the Professor with ample material to illustrate the subjects considered in the didactic lectures.

MEDICAL JURISPRUDENCE.

PROFESSOR GEO. WILKINS.

| | |
|------------------------------|----------------------------|
| WILLIAM FRASER, 1845. | R. PALMER HOWARD, 1854. |
| FRANCIS BADGLEY, 1849. | DUNCAN C. MACCALLUM, 1860. |
| FRANCIS C. T. ARNOLDI, 1850. | GEORGE E. FENWICK, 1867. |
| WILLIAM E. SCOTT, 1851. | WILLIAM GARDNER, 1875. |
| WILLIAM WRIGHT, 1852. | GEORGE WILKINS, 1883. |

This course includes Insanity, the subject being treated of in its Medical as well as Medico-Legal aspects. Special attention is devoted to the subject of blood stains, the Clinical, Microscopic and Spectroscopic tests for which are fully described and shown to the class. The various spectra of blood in its different conditions are shewn by Zeiss' Microspectroscope, so well adapted for shewing the reactions with exceedingly minute quantities of suspected material. Recent

researches in the diagnosis of human from animal blood are alluded to. In addition to the other subjects usually included in a course of this kind, Toxicology is taken up. The modes of action of poisons, general evidence of poisoning and classification of poisons are first treated of, after which the more common poisons are described, with reference to symptoms, post-mortem appearances, and chemical tests. The post-mortem appearances are illustrated by plates, and the tests are shown to the class.

OPHTHALMOLOGY AND OTOLOGY.

PROFESSOR FRANK BULLER, 1883.

Will include a course of lectures on diseases of the Eye and the Ear, both Didactic and Clinical. In the former, the general principles of diagnosis and treatment will be dealt with; in the latter, cases illustrative of the typical forms of ordinary diseases of these organs will be exhibited and explained to the class, and afterwards placed under the special care of gentlemen who may show themselves competent to take charge of them. A course of Operations on the cadaver will be open to such students as may wish to avail themselves of the same.

HYGIENE AND PUBLIC HEALTH.

PROFESSOR ROBERT CRAIK.

GEORGE ROSS, 1871.

WILLIAM GARDNER, 1879.

THOMAS G. RODDICK, 1873.

R. L. MACDONNELL, 1886.

ROBERT T. GODFREY, 1875.

ROBERT CRAIK, 1889.

This course comprises lectures on Drinking Water and Public Water Supplies; conditions of Soil and Water as affecting health, including Drainage and the various methods for the removal of Excreta; the Atmosphere, including Heating and Ventilation; Individual Hygiene, comprising the subjects of Food and Drink; Physical Exercise and Bathing; discussion of the respective merits of the various forms of each, precautions, contra-indications, &c. Village Sanitary Associations; Mutual Protective Sanitary Associations for cities.

BOTANY.

PROFESSOR D. P. PENHALLOW.

| | |
|-------------------------|---------------------|
| ANDREW F. HOLMES, 1829. | DR. PAPINEAU, 1845. |
| JAMES BARNSTON, 1851. | J. W. DAWSON, 1855. |
| D. P. PENHALLOW, 1883. | .. |

The course in Botany includes General Morphology, Histology, Physiology and Classification. It is designed to give special prominence to Physiology, which will be made comparative whenever practicable. The course is illustrated by the microscope and gas microscope, and by the collection, models and apparatus in the Peter Redpath Museum.*

ZOOLOGY.

PROFESSOR SIR WILLIAM DAWSON.

This course includes a systematic study of the classification of animals, illustrated by Canadian examples and by the collections in the Peter Redpath Museum. It forms a suitable preparation for collecting in any department of Canadian Zoology and Palaeontology, and an introduction to Comparative Physiology. It may be taken instead of Botany, or along with it, without any additional fee.

Students in Botany or Zoology will receive tickets to the Peter Redpath Museum, and to the Museum of the Natural History Society of Montreal.

PATHOLOGY.

W. G. JOHNSTON, DEMONSTRATOR.

This Course comprises :—

1. Twenty-five lectures on General Pathology to students of the 3rd year.
2. Weekly Pathological Demonstrations to students of the 3rd year. The gross and microscopic appearances of specimens collected during the week, are demonstrated to the final classes. In addition, special demonstrations in Pathological Histology are given throughout the session.

* Exemptions from Botany in the Matriculation, for Arts' Students, do not entitle Students to exemptions in the First year.

3. Instruction in Post-Mortems. The Autopsy Room of the General Hospital is in charge of the Demonstrator. The post-mortems are performed by the students in rotation under his direction, and systematic demonstrations of post-mortem methods, including those to be followed in Medico-Legal cases, will also be given.

PRACTICAL MICROSCOPY.

This is an entirely optional course, and will be in charge of Prof. Wilkins, who will have Dr. Johnston, the Demonstrator of Pathology, associated with him. It is intended especially for teaching the technique of Microscopy. Students will be shewn how to examine blood, &c., fresh specimens and morbid products, also to cut, stain, and mount specimens. For this purpose they will have furnished them both normal and diseased structures, with which they will be able to secure a cabinet of at least 100 specimens, which will be of great benefit when in practice. Reagents and everything, except cover-glasses and cabinet cases, provided. Fee \$12.

Extracts from the University Regulations with respect to the Courses of Lectures:—

1st. Each Professor shall deliver at least five Lectures during the week, except in Medical Jurisprudence and Botany, if extended through six months, in which case three Lectures a week will suffice.

2nd. Every Lecture shall be of one hour's duration.

3rd. Every Professor shall occasionally examine his class upon the subjects treated of in his preceding Lectures, and every such examination shall be considered as a Lecture.

4th. A roll of the names of the Students attending such class shall be called from time to time.

IV.

QUALIFICATIONS FOR THE DEGREE.

The following are Extracts from the Regulations respecting the qualifications of Candidates for the Degree in Medicine:—

No one entering after October 1st, 1884, will be admitted to the Degree of Doctor of Medicine and Master of Surgery, who shall not have attended Lectures for a period of at least four six months' sessions and one three months' summer session* in this University, or some other University, College or School of Medicine, approved of by this University.

2nd. Candidates for Final Examination shall furnish Testimonials of attendance on the following branches of Medical Education, viz.:—

ANATOMY.

PRACTICAL ANATOMY.

PHYSIOLOGY.

CHEMISTRY.

MATERIA MEDICA AND THERAPEUTICS.

PRINCIPLES AND PRACTICE OF SURGERY.

MIDWIFERY AND DISEASES OF WOMEN AND

CHILDREN.

THEORY AND PRACTICE OF MEDICINE.

CLINICAL MEDICINE.

CLINICAL SURGERY.

MEDICAL JURISPRUDENCE.

PRACTICAL CHEMISTRY.

BOTANY OR ZOOLOGY.

HYGIENE AND PUBLIC HEALTH.

HISTOLOGY.

GENERAL PATHOLOGY.

Of which Two Courses will be required of Six Months' duration.

Of which One Course of Six Months, or Two Courses of Three Months will be required.

Of which One Course will be required of Three Months' duration.

Ten Lectures and Twenty-five Demonstrations.

Twenty-five Lectures.

Provided, however, that Testimonials equivalent to, though not precisely the same as those above stated, may be presented and accepted.

3rd. The Candidates must give proof by ticket of having attended during eighteen months the practice of the Montreal General Hospital, or of some other Hospital approved of by this University, and of having compounded medicines for six months.

* To be taken after 3rd Winter Session

4th. He must also give proof by ticket of having attended for at least six months the practice of the University or other Lying-in-Hospital approved of by this University, and of having attended at least six cases of labor.

5th. No one will be permitted to become a Candidate for examination who shall not have attended at least one Session of this University, and one full course of all the branches included in its curriculum.

6th. Courses of less length than the above will only be received for the time over which they have extended.

7th. Students, except by special permission of the Faculty, must pursue the subjects of Anatomy, Chemistry, Histology and Botany in their first session, and are advised to take Physiology in addition.

8th. Candidates who fail to pass in not more than two subjects of the first two years may be granted a supplemental examination at the beginning of the following session.

9th. Supplemental examinations will not be granted, except by special permission of the Medical Faculty, and on written application stating reasons.

10th. No candidate will be permitted to proceed with the work of the final year until he has passed *all* the subjects comprised in the Primary examination.

11th. Candidates who fail to pass in a subject of which two courses are required, may, at the discretion of the Faculty, be required to attend a third course, and furnish a certificate of attendance thereon.

A course in Practical Anatomy will be accepted as equivalent to a third course of lectures in General and Descriptive Anatomy.

12th. The requirements for the summer session, when as at present taken after the third winter session, shall be :—

(a.) Daily Hospital attendance ;

(b.) Maternity attendance ; and

(c.) Any two weekly clinics in addition to the clinics on General Medicine and Surgery.

13th. Every Candidate for the Degree must, on or before the first day of March, present to the Registrar of the Medical Faculty testimonials of his qualifications, entitling him to an examination, and must at the same time deliver to the Registrar of the Faculty the following Certificate :—

MONTREAL, _____ 18—

I, the undersigned, being desirous of obtaining the Degree of Doctor of Medicine and Master of Surgery, do hereby declare that I have attained the age of twenty-one years, or if the case be otherwise, that I shall have attained the age of twenty-one years before the next graduation day, and that I am not (or shall not be at that time) under articles as a pupil or apprentice to any Physician, Surgeon, or Apothecary.

(Signed),

A.B.

14th. The trials to be undergone by the Candidate shall be such as are referred to under Section V.

15th. The following Oath or affirmation will be exacted from the Candidate before receiving his degree :—

SPONSIA ACADEMICA.

In Facultate Medicinae Universitatis.

Ego, A—— B——, Doctoratus in Arte Medica, titulo jam donandus, sancto coram Deo cordium scrutatore, spondeo;—me in omnibus grati animi officiis erga hanc Universitatem, ad extremum vitae halitum, perseveraturum; tum porro artem medicam caute, caste, et probe exercitaturum; et quoad in me est, omnia ad agricotorum corporum salutem conducentia, cum fide procuraturum; quæ denique, inter medendum, visa vel audita silere conveniat, non sine gravi causa vulgaturum. Ita praesens mihi spondenti adsit Numen.

16th. The fee for the Degree of Doctor of Medicine and Master of Surgery shall be thirty dollars, to be paid by the successful candidate immediately after examination.

—
V.

EXAMINATIONS.

Weekly examinations are held to test the progress of the Student; and in addition two or three written examinations are given throughout the Session.

The examinations at the close of each Session are arranged as follows :—

First Year.

Pass Examination in BOTANY and HISTOLOGY.

Sessional Examination in ANATOMY, CHEMISTRY, and PHYSIOLOGY.

A maximum of one hundred marks will be allowed for the Sessional Examination in each subject, which marks shall be reckoned in the ranking of the candidate after the examination of the following year.

Second Year.

Pass Examination in ANATOMY, CHEMISTRY, PRACTICAL CHEMISTRY and PHYSIOLOGY.

Sessional Examination in PHARMACOLOGY and THERAPEUTICS.

One hundred marks will be allowed for the Sessional Examination, which marks shall be reckoned in the ranking of the candidate after the examination of the following year.

Third Year.

Pass Examination in PHARMACOLOGY and THERAPEUTICS, MEDICAL JURISPRUDENCE, HYGIENE and PATHOLOGY.

Fourth Year.

Pass Examination in MEDICINE, SURGERY, OBSTETRICS, CLINICAL MEDICINE, CLINICAL SURGERY.

By means of the above arrangement a certain definite amount of work must be accomplished in each year, and an equitable division is made between the Primary and Final branches.

VI.

MEDALS AND PRIZES.

1st. The Holmes' Gold Medal, awarded to the Student of the graduating class who receives the highest aggregate number of marks for the best examinations, written and oral, in both Primary and Final branches.

The Student who gains the Holmes' Medal has the option of exchanging it for a Bronze Medal, and the money equivalent of the Gold Medal.

2nd. A Prize in Books awarded for the best examination, written and oral, in the Final branches. The gold medallist is not permitted to compete for this prize.

3rd. A Prize in Books awarded for the best examination, written and oral, in the Primary branches.

4th. The Sutherland Gold Medal, awarded for the best examination in Theoretical and Practical Chemistry, together with creditable examination in the Primary branches.

5th. A Prize in Books for the best examination in Practical Anatomy.

6th. Prizes in Botany.

A Prize in Books for the best examination.

7th. The Clemesha Prize in Clinical Therapeutics.

VII.

FEES.

Distributed according to years, the Class Fees are as follows:—

First Year.

| | |
|--------------------------|----------|
| Anatomy..... | \$12 |
| Physiology..... | 12 |
| Histology..... | 6 |
| Chemistry..... | 12 |
| Practical Anatomy..... | 12 |
| Botany..... | 5 |
| Dissecting Material..... | 5 |
| Enregistration..... | 5 |
| Total..... | \$69 |

Second Year.

| | |
|---------------------------|----------|
| Anatomy..... | \$12 |
| Practical Anatomy..... | 12 |
| Physiology..... | 12 |
| Chemistry..... | 12 |
| Practical Chemistry..... | 12 |
| Chemical Reagents..... | 3 |
| Materia Medica..... | 12 |
| Practical Physiology..... | 6 |
| Hygiene..... | 6 |
| Dissecting Material..... | 5 |
| Enregistration..... | 5 |
| Total..... | \$97 |

Third Year.

| | |

| Total..... | \$65 |

HOSPITAL FEES.

| | |
|---|----------|
| Montreal General Hospital, Perpetual Ticket..... | \$20 |
| Montreal Maternity..... | 8 |
| Total..... | \$28 |
| Graduation Fee..... | \$30 |
| Matriculation Fee, payable only if the Student takes the University Matriculation..... | 5 |
| Total Collegiate and Hospital expenses, spread over four years, about..... | \$416.00 |

All fees are payable in advance, to the Registrar, and except by permission of the Faculty will not be received later than 1st November.

It is suggested to parents or guardians of students that the fees be transmitted direct by cheque or P. O. Order, to the Registrar, who will furnish official receipts.

The total Collegiate and Hospital fees (graduation and Montreal General Hospital fees not included) for all students entering on and after the 1st of October, 1890, will be \$400. This sum is to be paid in four annual instalments of \$100 each. The above sum of \$400 represents the tuition for four winter and one summer session, and if the student elects to attend the two other summer sessions of his course, he may do so without further payment.

VIII.

TEXT BOOKS.

(Prices current in Montreal.)

ANATOMY.—Gray, \$6; Wilson, \$4; Quain (Eng. Ed.) \$9.75.**PRACTICAL ANATOMY.**—Heath's Dissector, \$4.50; Holden's Dissector, \$5.00; and Landmark's, \$1.00; Ellis' Demonstrations.**PHYSICS.**—Balfour Stewart, \$1.35.**INORGANIC CHEMISTRY.**—Millar, \$1.00; Wurtz's Elementary Chemistry, \$2.50.**ORGANIC CHEMISTRY.**—Armstrong, \$1.00.**PRACTICAL CHEMISTRY.**—Odling, \$1.75.**PHARMACOLOGY and THERAPEUTICS.**—Wood, \$6.00; Lauder Brunton, \$6.00; Whitla, 3.50; and Bruce, \$1.50.**PHYSIOLOGY.**—Huxley's *Elementary Lessons*, \$1.35; Foster, \$3.25; Prof. Mills' Text-book of Animal Physiology (in the press), and Outlines of Lectures, \$1.00.**PATHOLOGY.**—Orth's Diagnosis in Pathology, \$3.50; Payne, \$3.50.**HISTOLOGY.**—Klein's Elements, \$1.50; Schäfer's Essentials of Histology, \$2.25.**SURGERY.**—Holmes' Surgery (Eng. Ed.) \$9.00; Erichsen, \$9.00; Druitt, \$4.25; Bryant, \$6.50; Treves, \$6.00.**PRACTICE OF MEDICINE.**—Flint, \$5.50; Roberts, \$5.00; Bristow, \$5.00; DaCosta, \$6.00; Fagge, \$10.00; Quain's Dict.**FOR REFERENCE.**—Pepper's System of Medicine.**CLINICAL MEDICINE.**—Finlayson's Clinical Manual, \$2.60; Flint on Auscultation and Percussion, \$1.75; and Loomis on Physical Diagnosis, \$3.00.**MEDICAL JURISPRUDENCE.**—Husband, \$3.25; Guy and Ferrier, \$3.75; Reese, \$3.00.

MIDWIFERY.—Lusk, \$5.00; Galabin, \$3.00.

GYN. ECOLOGY.—Edis, \$3.00; Goodell's Lessons, \$4.00; Hart and Barbour's Manual, \$7.50; Thorburn, \$7.50; Skeene.

HYGIENE.—Parks, \$5.50; Wilson, \$2.75.

BOTANY.—Gray's Text Book of Histology and Physiology, \$2.25.

ZOOLOGY.—Sir William Dawson's Handbook of Canadian Zoology, \$1.25.

IX.

MUSEUM.

For the past fifty years, the rich Pathological Material furnished by the Montreal General Hospital has been collected here. The Faculty are also greatly indebted to many medical men throughout Canada and different parts of the world for important contributions to the Museum.

During the past few years, numerous and extremely important additions have been made to the Medical Museum.

It is particularly rich in specimens of Aneurisms. In addition to containing a large number of the more common varieties of these formations, there are specimens of such rare conditions as Aneurism of the Hepatic and Superior Mesenteric Arteries, Traumatic Aneurism of the Vertebral, together with several of the cerebral and pulmonary arteries. The most important collection probably in existence of hearts affected with "Malignant Endocarditis" is also found. The Faculty are indebted to Prof. Osler, late of this University, for this collection.

The Museum contains also a very large collection of different forms of calculi. The Faculty are mainly indebted to Prof. Fenwick for this collection.

During the past two years, Mr. Bailly, osteologist and articulator (lately with Trianond of Paris), has been engaged in arranging and mounting the very large number of specimens of disease and injuries of bones which have been accumulating for years. In this collection are to be found examples of fractures and dislocations of the spine, osteoporosis, congenital dislocation of the hip, fracture of the astragalus, multiple exostosis, &c., &c.

Obstetrical Department of the Museum.

Besides the ordinary pathological preparations, dry and moist, usually found in Museums, this department contains a complete set of models of deformed pelvis, a series of preparations in wax, illustrating the normal relations of the pelvic organs, the development of the Uterus and its contents during pregnancy, various abnormalities, twin pregnancy, foetal circulation &c., a series of colored casts of frozen sections, Tarnier's artificial pelvis, Budin's bronze mechanical pelvis, models of obstetrical instruments, &c.

Additions are being constantly made, and ere long the department will possess a complete collection of models, casts, preparations and apparatus for the practical teaching and illustration of Obstetrics.

Anatomical Museum.

In addition of the already large collection of normal and abnormal osteology, comparative and human, skeletons of various classes of animals, moist preparations and frozen sections, the following preparations have been recently added to the Museum:—

- (1) A series of articulated skeletons of fore and hind limbs of the various domestic animals prepared by the articulator Mr. Baily.
- (2) Numerous moist preparations presented by the Professor of Anatomy.
- (3) A complete set of Steger's beautiful colored casts taken from the celebrated frozen sections of Professors His and Braune of Leipzig. These preparations have been placed in the Museum so that they can be constantly consulted by the Students.
- (4) (a) A complete set of Steger's brain sections.
 (b) Set of hardened brains with the various lobes, convolutions, ganglia, &c., in different colors.
 (c) Models of the cerebro-spinal and sympathetic nervous systems.
 (d) A set of Prof. D. J. Cunningham's beautiful casts of the Brain in situ, showing the relations of convolutions to the skull.
- (5) (a) A set of preparations showing the anomaly of vessels entering the kidneys.
 (b) A number of rare anomalies of the aorta and its branches.
 (c) A series of preparations showing the shoulder girdle in various animals.

X.

LIBRARY.

The Library of the Medical Faculty now comprises upwards of twelve thousand volumes, the largest special library connected with any medical school on this continent.

The valuable library of the late Dr. Robert Palmer Howard has been donated to the Medical Faculty. It consists of several thousand volumes, including a very complete collection of works on Diseases of the Chest.

The standard text-books and works of reference, together with complete files of the leading periodicals, are on the shelves. Students may obtain books on making a deposit of \$5, which is refunded on returning the volumes.

XI.

MCGILL MEDICAL SOCIETY.

This Society, composed of enregistered Students of the Faculty meets once a week during the Summer Session, and fortnightly during the Winter, for the reading of papers and the discussion of medical subjects.

A reading room has been established in connection with the Society, in which the leading English and American Medical Journals are on file.

The leading daily and weekly newspapers of the Dominion are also kept on file.

XII.

COST OF LIVING, &c.

This will, of course, vary with the tastes and habits of the Student, but the necessary expenses need not exceed those in smaller towns. Good board may be obtained from \$15 to \$20 per month. A list of boarding houses is prepared annually by the Secretary of the University, and may be procured from the Janitor at the Medical College.

XIII.

LICENSED BOARDING-HOUSES.

1. All Students under 21 years of age, not residing with parents or guardians, shall reside in licensed boarding-houses, unless they produce written authority from parents or guardians to reside elsewhere.

2. Persons applying for a license to keep boarding-houses shall produce evidence satisfactory to the Principal as to their character and fitness, and the suitability of the house for the health and comfort of the Students. They shall also supply him with a statement of charges.

3. The keeper of every lodging-house shall deposit with the Secretary of the University, on or before September 10th, in every year, a certificate as to the sanitary condition of the house from some competent officer or sanitary engineer recognized by the Principal.

4. A list of boarding-houses licensed under the above regulations shall be kept in the office of the Secretary, and shall be accessible to all members of the University and intending students.

—
XIV.**HOSPITALS.****Montreal General Hospital.**

The Montreal General Hospital is the most extensive clinical field in the Dominion. A much larger number of in-door and out-door patients receive treatment there than in any other Canadian Hospital. Last year's report shows that 2,545 Medical and Surgical cases were treated in the wards, and the great proportion of these were acute cases, as may be gathered from the fact that the average duration of residence was only 23.6 days.

The large number of out-door patients that are treated in the Hospital—averaging from eighty to ninety daily—supply illustrations of most of the diseases of infants and children, of very many of the eye and skin, and of those chronic and ill-defined ailments which, as they do not require admission to the wards of a hospital, would not otherwise come under the observation of the Student.

The large number of patients affected with diseases of the eye and

ear, now attending the out-door department, will afford Students ample opportunity to become familiar with all the ordinary affections of those organs, and to make themselves proficient in the use of the ophthalmoscope, and it is hoped that every student will thus seek to gain a practical knowledge of this important branch of Medicine and Surgery. Operations are performed on the eye by the Ophthalmic Surgeon after the out-door patients have been seen, and Students are invited to attend the same, and, as far as practicable, to keep such cases under observation so long as they remain in the Hospital.

There are now special departments in the Hospital for Gynæcology and Laryngology, presided over by Specialists in these branches. Students are thus enabled to acquire special technical knowledge under skilled direction. The plan of teaching practical gynæcology for the past five years with marked success has been the limitation of the number of Students to two or three, who, in rotation, assist at the examinations, and receive instruction in the diagnosis and treatment of uterine diseases and the use of gynæcological instruments.

Recently two additional special clinics have been instituted in connection with the Out-door Department : one for diseases of children and the other for the diseases of the nervous system.

CLINICAL CLERKS in both medical and surgical wards are appointed every three months, and each one during his term of service conducts, under the immediate directions of the Clinical Professors, the reporting of all cases in the ward allotted him. The holding of one of these offices is found to be of the greatest possible advantage to Students, as affording a true *practical* training for his future professional life. They will be awarded on application at the end of each Session to final Students of that year, in order of their standing in the primary examination.

DRESSERS are also appointed to the Surgical wards and to the Out-door Department. For these appointments, application is to be made to the Professor of Clinical Surgery, and to the Assistant Surgeons.

The Operating Room (used also for a lecture room) is so constructed as to enable the Students to obtain a good view of the operations.

Montreal Dispensary.

ST. ANTOINE STREET.

Over 12,000 patients yearly are treated at this Institution. The cases are of great variety, comprising a large number of pulmonary affections and children's diseases. Minor operations are of daily occurrence, and excellent practice is afforded in the application of splints and bandages. The attending Physicians furnish Students with all possible facilities. The hours of attendance are from 12 to 2 daily during the winter session and from 4 to 6 p.m. during the summer session.

The Montreal Maternity.

The Faculty have great pleasure in announcing that the Corporation of the Montreal Maternity have recently made very important additions to their building, and have still further improvements in contemplation. Students will therefore have greatly increased facilities for obtaining a practical knowledge of obstetrics. The institution is under the direct supervision of the Professor of Midwifery, who devotes much time and attention to individual instruction. Students who have attended one course of lectures are furnished with cases in rotation, which they are required to report and attend till convalescence. They are advised to take their clinical midwifery as much as possible during the summer session. Though only six cases are required to qualify for the license of the Ontario and Quebec Medical Boards, twenty cases are demanded by the licensing bodies of Great Britain. A sufficient number of cases will be assigned to students who contemplate presenting themselves for British qualifications. Two resident accoucheurs are appointed yearly from the graduating class to hold office for a period of six months each. By an arrangement with the authorities of the Montreal General Hospital one of the residents acts as Clinical assistant to the Gynaecologist for a period of six months, a change which has greatly enhanced the value of this appointment.

XV.**STUDENTS' APPOINTMENTS.**

General Hospital—Five Resident Medical Officers.

Clinical Clerk, Gynaecology.

“ “ Laryngology.

Clinical Clerk, Diseases of Children.
 " " Dermatology.
 " " Diseases of Nervous System.
 University Maternity.—Two Resident Medical Officers.
 Out-door Dressers.
 Dressers in Eye and Ear Department.
 Surgical Dressers (In-door).
 Medical Clinical Clerks.
 Post-mortem Clerks.
 Student Demonstrators of Anatomy, 4 third-year Students.
 Prosector to Chair of Anatomy.
 Assistants in Practical Histology Course, 2.
 Assistants in Practical Physiology Course, 4.
 Assistants in Practical Chemistry, 2.

XV.

RULES FOR STUDENTS.

1. In the case of disorderly conduct, any Student may, at the discretion of the Professor, be required to leave the Class-room. Persistence in any offence against discipline after admonition by the Professor shall be reported to the Dean of the Faculty. The Dean may, at his discretion, reprimand the Student, or refer the matter to the Faculty at its next meeting, and may in the interval suspend from classes.
2. Absence from any number of lectures can only be excused by necessity or duty, of which proof must be given, when called for, to the Faculty. The number of times of absence, from necessity or duty, that shall disqualify for the keeping of a Session, shall in each case be determined by the Faculty.
3. While in the College, Students are expected to conduct themselves in the same orderly manner as in the Class-room.
4. When Students are brought before the Faculty under the above rules, the Faculty may reprimand, impose fines, disqualify from competing for prizes and honors, suspend from Classes, or report to the Corporation for expulsion.

XVI.

PAST SESSION.

The total number of students enregistered in the Medical Faculty during the past session was 233, of whom there were, from—

| | | | |
|--------------------|-----|-----------------------|----|
| Ontario | 106 | P. E. Island | 10 |
| Quebec..... | 57 | Newfoundland | 2 |
| New Brunswick..... | 19 | Manitoba | 4 |
| Nova Scotia..... | 23 | British Columbia..... | 1 |
| United States..... | 10 | West Indies | 1 |

The following gentlemen have passed their Primary Examination, which comprises the following subjects :—Anatomy, Practical Anatomy, Chemistry, Practical Chemistry, Physiology, Histology and Botany :—

| | | |
|------------------|-----------------|-------------------|
| Alexander, W. W. | Hamilton, W. F. | McTirimmon, A. A. |
| Ault, C. A. | Harris, N. M. | McMillan, J. H. |
| Beers, A. H. | Harrison, J. D. | McGuire, J. C. |
| Bennie, R. | Hattie, W. H. | O'Connor, C. |
| Booth, J. S. | Hayes, John | Oliver A. J. |
| Bowie, R. A. | Hubert, P. T. | Parke, G. H. |
| Brown, W. A. | Jenkins, W. E. | Patton, H. M. |
| Busby, J. | Keir, E. J. | Robertson, E. A. |
| Calkin, B. H. | Kelly, C. I. | Robertson, T. F. |
| Clemesha, J. C. | Kemp, H. D. | Smith, C. F. |
| Dewar, Alex. | Lambert, E. M. | Sparling, A. J. |
| Farwell, W. A. | Love, A. | Speir, J. R. |
| Fletcher, R. W. | Lovering, W. T. | Troy, W. |
| Gibson, R. J. | Mader, A. I. | Tunstall, A. |
| Gorrell, A. S. | Martin, M. Mc | Webster, R. E. |
| Grafton, E. A. | Morrow, W. S. | Williamson, H. M. |
| Greene, T. J. | Mulligan, E. A. | Williamson, W. P. |
| | Woodruff, E. H. | |

The following gentlemen, 38 in number, have fulfilled all the requirements to entitle them to the degree of M.D., C.M. from the University. In addition to the Primary subjects mentioned, they have passed a satisfactory examination, both written and oral, on the following subjects: Principles and Practice of Surgery, Theory and Practice of Medicine, Obstetrics and Diseases of Infancy, Gynaecology, Pharmacology and Therapeutics, Medical Jurisprudence, Pathology and Hygiene,—and also Clinical Examinations in Medicine and Surgery conducted at the bedside in the Hospital :—

| Glendenning, R. T. | McLennan, D. A. | |

MEDAL, PRIZES AND HONOURS.

THE HOLMES' GOLD MEDAL, FOR THE BEST EXAMINATION IN ALL THE BRANCHES COMPRISED IN THE MEDICAL CURRICULUM IS awarded to Alexander E. Garrow, of Ottawa, Ont.

THE PRIZE FOR THE BEST EXAMINATION IN THE FINAL BRANCHES is awarded to Hugh McKercher, of Stittsville, Ont.

THE PRIZE FOR THE BEST EXAMINATION IN THE PRIMARY BRANCHES is awarded to William Arthur Brown of Chesterville, Ont.

THE SUTHERLAND GOLD MEDAL is awarded to John Craig Clemesha, of Port Hope, Ont.

The following gentlemen, arranged in order of merit, deserve honourable mention :—

In the Priminary Branches — Hamilton, Morrow, Busby, Bowie, Clemesha, Spier, Farwell, Grafton, Kelly, Dewar, Robertson, T. F. Troy, Lambert, Williamson, W. P. McMillan and Alexander.

In the Final Branches — Campbell, McCurdy, Murray, Philp, England and Creasor.

PROFESSORS' PRIZES.

BOTANY.—W. B. Hallam Massiah, of Barbadoes, West Indies.

ANATOMY.—2nd year, W. A. Brown. Honourable Mention, T. F. Robertson. 1st year, James Henderson, of Warkworth, Ont.

SUMMER SESSION.

1889.

The Fourteenth Summer Session of the Faculty of Medicine will begin on the 9th of April, and continue twelve weeks.

The Classes are chiefly practical and demonstrative, and are designed to supplement and extend the teaching of the regular Winter Session.

The attention of Students of this University, who intend to present themselves for the examination for the degree of M.D. in 1890, is particularly directed to the regulations instituted in 1884, making the third summer session compulsory.

In future, the regular University lectures on *Hygiene* will be delivered only during the summer sessions.

Students from other schools are received on the same terms as, and have all the advantages of, regular students.

The special advantages of attendance upon a Summer Session are:—

(1) The benefit derived from the practical and demonstrative classes.

(2) Dresserships and Clinical Clerkships are more easily obtained at the Hospitals, and the student has more time at his disposal to follow up the cases.

(3) Cases of Midwifery are obtained in greater number at the Montreal Maternity.

(4) Systematic study can be carried on more effectively than at home.

(5) The regular courses on Hygiene and Practical Chemistry can be attended.

The advantages offered by the City of Montreal for the practical study of Medicine and Surgery are unsurpassed in the Dominion.

In the wards of the General Hospital there is always—and more particularly in the summer months, when navigation is opened—a large collection of interesting medical and surgical cases. In the Out door Department there is a daily attendance of between 90 and

100 patients, which affords excellent opportunities for instruction in general medical and surgical practice. In addition there are special clinics in the following different departments: 1. Eye and ear; 2. Nose and throat; 3. Diseases of children; 4. Diseases of the nervous system; 5. Diseases of women.

At the Montreal Dispensary, in addition to general Medical instruction, there is a Gynaecological Clinic.

The Faculty has much pleasure in announcing the following prospectus:—

I.—CLINICAL INSTRUCTION,

Which will comprise:—

A.—Bedside Instruction—

| | |
|---------------|---------------------------------------|
| SURGERY..... | Dr. Fenwick and Dr. Shepherd. |
| MEDICINE..... | Dr. Wilkins and Dr. R. L. MacDonnell. |

B.—Weekly Clinics, in the Theatre of the General Hospital, on—

| | |
|---|--|
| 1. GENERAL SURGERY | Dr. Fenwick, Roddick, Shepherd and Bell. |
| 2. GENERAL MEDICINE | Dr. Ross, Wilkins, and R. L. MacDonnell. |
| 3. GYNAECOLOGY | Dr. Gardner & Alloway |
| 4. DISEASES OF THE EYE AND EAR..... | Dr. Buller. |
| 5. DISEASES OF THE NOSE AND THROAT..... | Dr. Major. |
| 6. DISEASES OF CHILDREN | Dr. Blackader. |
| 7. VENEREAL DISEASES..... | Dr. Bell. |
| 8. DISEASES OF THE NERVOUS SYSTEM..... | Dr. Stewart. |
| 9. DISEASES OF THE SKIN..... | Dr. Shepherd. |
| 10. ORTHOPAEDICS | Dr. Roddick. |

D.—Out-Patient Clinics—1. At the General Hospital—

| | |
|--|-----------------------------|
| a. GENERAL MEDICINE AND SURGERY..... | Medical and Surgical Staff. |
| b. *GYNAECOLOGY..... | Dr. Gardner & Alloway |
| c. *DISEASES OF EYE AND EAR..... | Dr. Buller. |
| d. *DISEASES OF THROAT AND NOSE..... | Dr. Major. |
| e. DISEASES OF CHILDREN | Dr. Blackader. |
| f. DISEASES OF THE NERVOUS SYSTEM..... | Dr. Stewart. |

2 At the Montreal Dispensary—

| | |
|---------------------|-----------------------|
| A. MEDICINE..... | Dr. Stewart & Finley. |
| B. GYNAECOLOGY..... | Dr. Alloway. |

E.—Clinical Instruction in Obstetrics—

At the Montreal Maternity—

| | |
|--|--------------|
| 1. THE MANAGEMENT OF CASES OF LABOR..... | Dr. Cameron. |
| 2. THE AFTER CARE OF CASES..... | |

* A limited number of students will attend in rotation.

II.—PRACTICAL CLASSES.

- †2. **Practical Chemistry.**—Same as, and may be taken in lieu of, the Winter Course. } **Dr. Ruttan.**
Fee, \$15.00.....
- †3. **Operative Surgery.**—A complete course of operations on the cadaver, including Amputations, Excisions, Ligations, &c. The students perform the operations in rotation. Fee, \$5.00..... } **Dr. Shepherd.**
4. **Obstetrical Presentations and Operations.**—A series of practical demonstrations on the cadaver or phantom } **Dr. Cameron.**
5. **Deformed Pelvis.**—A series of demonstrations illustrating the influence of deformity of the Pelvis upon Labor..... } **Dr. Cameron.**
- †6. **Clinical Microscopy.**—Microscopes, Reagents and Material provided } **Dr. Wilkins.**
- †7. **Operative Ophthalmology.**—This will consist in a series of demonstrations on the methods of performing the usual eye operations. Fee, \$2.00..... } **Dr. Buller.**
8. **Anomalies of Refraction and Accommodation.**—A course of four demonstrations, giving practical illustrations of the methods of recognising and treating these conditions..... } **Dr. Buller.**
9. **Practical Ophthalmoscopy.**—To consist of a series of demonstrations and practical exercises in the use of the Ophthalmoscope..... } **Dr. Buller.**
10. **Laryngoscopy and Rhinoscopy.**—A course of demonstrations and exercises in the use of the Laryngoscope and Rhinoscope..... } **Dr. Major.**
11. **Electro-Therapeutics.**—Students will be practically trained in the method of using the different forms of electricity in the treatment of disease..... } **Dr. Stewart.**
12. **Applied Anatomy—Medical and Surgical.**—Surface-marking, Brain and Spinal Cord, Larynx, Thorax, Abdomen, Genito-Urinary Organs, Surgical Spaces..... } **Dr. Finley.**
13. **Minor Surgery.**—Including Bandaging, Application of Splints, Haemostatics, Catheterism, Artificial Respiration, &c. } **Dr. Sutherland.**
14. **Clinical Chemistry.**—A course of twelve demonstrations, designed to familiarise students with the more recent and approved methods of examining chemically, abnormal secretions, morbid products, &c., at the bedside..... } **Dr. Ruttan.**

15. **Morbid Anatomy.**—Consisting of systematic demonstrations upon post-mortem methods and pathological anatomy in the section-room of the General Hospital. Students will make the post-mortems in rotation, and receive instruction in the method of performing them, and keeping record of their observations..... } **Drs. Johnston and Finley.**
- †16. **Practical Materia Medica.**—A fee sufficient to cover the cost of material will be charged for this course..... } **Dr. Stewart.**
17. **Heredity.**—A course of 8—12 lectures on the Laws of Heredity in Health and Disease..... } **Dr. Mills.**
18. **A Practical Course** in the qualitative and quantitative estimation of the more important constituents of the urine, and the rapid detection of the common poisons. A small fee will be charged to cover cost of material.
19. **Clinical Minor Surgery**..... } **Dr. R. J. B. Howard.**

SESSION 1888-89.

STUDENTS IN MEDICINE.

LIST OF PRIZEMEN AND MEDALLISTS IN THE
MEDICAL FACULTY.

In 1855 the examinations were divided into Primary and Final, and prizes were established for the best Thesis and for the best Examination in the Primary and Final branches.

In 1865 the Holmes' Gold Medal was established in honour of Dr. Holmes, and is given for the best examination in both Primary and Final branches.

The following is the List with the present addresses of the recipients:—

1854. FOR GENERAL PROFICIENCY.—*1st Prize*—Robert Craik, Montreal.
2nd Prize—Thomas Simpson, Montreal.
1855. THESIS.—James McG. Stevenson, Bryanston, Ont.
Final Examination.—James McG. Stevenson, Bryanston, Ont.
Primary Examination.—Walter J. Henry.*
1856. THESIS.—Walter James Henry,* and W. J. Jones, Prescott, O.
Final Examination.—E. Laberge.*
Primary Examination.—Hon. Levi R. Church, Montreal, Q.
1857. THESIS.—Hon. Levi R. Church, Montreal, and D. T. Robertson, Lennoxville, Q.
Final Examination.—Hon. Levi R. Church, Montreal, Q.
Primary Examination.—James Kerr.*
1858. THESIS.—Timothy F. English,* and W. F. Taylor, Peterboro', O.
Final Examination.—Wm. Harkin.*
Primary Examination.—Wm. Harkin.*
1859. THESIS.—Edward W. Smith.*
Final Examination.—James J. O'Dea, Stapleton, Staten Island, New York.
Primary Examination.—Henry Warren.*
1860. THESIS.—J. W. Pickup.*
Final Examination.—Henry Warren.*
Primary Examination.—Joseph M. Drake,* and Fred. Sutherland.

1861. THESIS.—Joseph M. Drake,* F. J. Austin, Sherbrooke, Q., and D. L. Philip, Brantford, O.
Final Examination.—Joseph M. Drake.*
Primary Examination.—Thos. C. Walton, Inspector U.S. Navy, Annapolis, Md.
1862. THESIS.—R. M. Bucke, London, O.
Final Examination.—John A. Stewart.*
Primary Examination.—John J. Marston, U. S. Army.
1863. THESIS.—Wm. C. Gustin.*
Final Examination.—J. J. Marston, U. S. Army.
Primary Examination.—R. A. Kennedy,* and Peter A. McDougall, Ottawa, and C. F. Bullen.*
1864. THESIS.—W. W. Squiré.*
Final Examination.—D. Howard Harrison, Winnipeg.
Primary Examination.—Kenneth Reid, New York.
1865. HOLMES' GOLD MEDAL.—E. P. Hurd, Newburyport, Mass.
Final Examination.—H. L. Vercoe.*
Primary Examination.—George Ross, Montreal, and W. Gardner, Montreal.
1866. HOLMES' MEDALLIST.—George Ross, M.A., Montreal, Q.
Final Examination.—William Gardner, Montreal, Q.
Primary Examination.—Clinton W. Kelly, Louisville, Ky.
1867. HOLMES' MEDALLIST.—Clinton W. Kelly, Louisville, Ky.
Final Examination.—C. W. Kelly, Louisville, Ky.
Primary Examination.—Wm. Henry Patterson.
1868. HOLMES' MEDALLIST.—T. G. Roddick, Montreal, Q.
Final Examination.—T. G. Roddick, Montreal, Q.
Primary Examination.—Andrew Harkness, Lancaster, O.
1869. HOLMES' MEDALLIST.—T. D. Lucas.*
Final Examination.—Andrew Harkness, Lancaster, O.
Primary Examination.—Alexander A. Henderson, Ottawa, O.
1870. HOLMES' MEDALLIST.—A. A. Henderson, Ottawa, O.
Final Examination.—O. H. E. Clarke, St. Louis, Mo.
Primary Examination.—J. H. Mathieson, St. Mary's, O.
1871. HOLMES' MEDALLIST.—J. H. Mathieson, St. Mary's, O.
Final Examination.—H. P. Wright, Ottawa, O.
Primary Examination.—Thomas Kelly, Omaha.
1872. HOLMES' MEDALLIST.—Hamilton Allan, Oconto, Wis.
Final Examination.—G. A. Starke, Milwaukee.
Primary Examination.—F. J. Shepherd, Montreal.
 SPECIAL PRIZE FOR THESIS.—W. Osler, Baltimore, Md.

1873. HOLMES' MEDALLIST.—Thomas Kelly, Omaha.
Final Examination.—D. A. Alguire, Cornwall, Ont.
Primary Examination.—J. D. Cline, B.A.*
1874. HOLMES' MEDALLIST.—J. D. Cline, B.A.*
Final Examination.—J. C. Cameron, Montreal.
Primary Examination.—Simon J. Tunstall, B.A., Lytton, B.C.
1875. HOLMES' MEDALLIST.—S. J. Tunstall, B.A., Lytton, B.C.
Final Examination.—J. B. Benson, Chatham, N.B.
Primary Examination.—C. H. Murray, B.A.* ; R. H. W. Powell, Ottawa, Ont.
1876. HOLMES' MEDALLIST.—Robert H. W. Powell, Ottawa, O.
Final Examination.—Chas. H. Murray, B.A.*
Primary Examination.—Alex. C. Fraser, Manitowoc, Wis.
SPECIAL PRIZE FOR THESIS.—R. L. MacDonnell, B.A., Montreal.
1877. HOLMES' MEDALLIST.—James Bell, Montreal, Q.
Final Examination.—W. D. Oakley, Streetsville, O.
Final Examination.—H. N. Vineberg, New York.
1878. HOLMES' MEDALLIST.—H. N. Vineberg, New York.
Final Examination.—T. W. Mills, M.A., Montreal.
Primary Examination.—W. R. Sutherland, Montreal.
SUTHERLAND GOLD MEDAL.—J. M. Lefebvre, Brockville, O.
1879. HOLMES' MEDALLIST.—J. B. Lawford, London, Eng.
Final Examination.—A. W. Imrie, Detroit.
Primary Examination.—J. A. McDonald, Montreal.
SUTHERLAND GOLD MEDAL.—W. L. Grey, Pembroke, O.
1880. HOLMES' MEDALLIST.—J. A. McDonald, Montreal.
Final Examination.—H. B. Small, Ottawa.
Primary Examination.—James Ross, B.A., Dundas, O.
SUTHERLAND GOLD MEDAL.—H. W. Thornton, B.A., New Richmond, Q.
1881. HOLMES' MEDALLIST.—James Ross, B.A., Dundas, O.
Final Examination.—John W. Ross, Cohoes, N.Y.
Primary Examination.—R. J. B. Howard, B.A., London, Eng.
SUTHERLAND GOLD MEDAL.—C. E. Cameron, Montreal.
1882. HOLMES' MEDALLIST.—R. J. B. Howard, B.A., London, Eng.
Final Examination.—Henry V. Ogden, B.A., Milwaukee, Wis.
Primary Examination.—George A. Graham, Hamilton, O.
SUTHERLAND GOLD MEDAL.—Wyatt G. Johnston, Montreal, Q.
MORRICE SCHOLAR.—Wyatt G. Johnston, Montreal, Q.

1883. **HOLMES' MEDALLIST.**—C. E. Cameron, Montreal.
Final Examination.—L. B. Loring, Sherbrooke, Q.
Primary Examination.—Ed. G. Wood, Mitchell, O.
SUTHERLAND GOLD MEDAL.—R. F. Ruttan, B.A., Montreal, Q.
MORRICE SCHOLAR.—R. F. Ruttan, B.A., Montreal, Q.
1884. **HOLMES' MEDALLIST.**—Wm. A. Ferguson, Bathurst, N.B.
Final Examination.—James P. McInerney, Kingston, N.B.
Primary Examination.—Smith Gustin, Bay City, Mich.
SUTHERLAND GOLD MEDAL.—John Elder, B.A., Huntingdon, Q.
1885. **HOLMES' MEDALLIST.**—Edwin G. Wood, Mitchell, O.
Final Examination.—Smith Gustin, Bay City, Mich.
Primary Examination.—Ed. J. Evans, La Crosse, Wisc.
SUTHERLAND GOLD MEDAL.—H. A. Lafleur, Baltimore, Md.
1886. **HOLMES' MEDALLIST.**—Herbert S. Birkett, Montreal, Q.
Final Examination.—Walter W. White, M.A., St. John, N.B.
Primary Examination.—Walter I. Bradley, Sault St. Marie.
SUTHERLAND GOLD MEDAL.—Walter I. Bradley, Sault St. Marie.
1887. **HOLMES' MEDALLIST.**—Ed. Evans, La Crosse, Wisc.
Final Examination.—Henri A. Lafleur, B.A., Baltimore, Md.
Primary Examination.—A. E. Garrow, Ottawa.
SUTHERLAND GOLD MEDAL.—John Creasor, Owen Sound, O.
1888. **HOLMES' MEDALLIST.**—N. D. Gunne, St. Marys, O.
Final Examination.—W. G. Stewart, Montreal, Q.
Primary Examination.—R. E. McKechnie, Winnipeg.
SUTHERLAND GOLD MEDAL.—C. W. Bissett, River Bourgeois, N.S.
1889. **HOLMES' MEDALLIST.**—Alex. E. Garrow, Ottawa, O.
Final Examination.—Hugh McKercher, Point Edward, O.
Primary Examination.—Wm. Alfred Brown, Chesterville, O.
SUTHERLAND GOLD MEDAL.—John C. Clemesha, Port Hope, O.

• Deceased.

HOW TO BECOME A REGISTERED PRACTITIONER.

The possession of an M.D. degree does not entitle the holder to practice. He must be *registered*. In the Provinces of the Dominion, with the exception of Ontario, the possession of a Degree in Medicine from a recognized University entitles the holder to register. In *Quebec*, graduates of the Universities of the province must appear in person at the May or September meeting of the Board, and present and swear to their diplomas. Registration is granted only at these periods. It is optional with the Board whether the holder of a degree from a Canadian University outside the Province of Quebec can register without further examination. In some cases the examination has been enforced. In *Ontario*, the examination of the College of Physicians and Surgeons of the province must be passed before registration. The examination is held every spring. In *Manitoba* and *British Columbia*, it is necessary to undergo an examination before registration. In *Nova Scotia* and *New Brunswick*, the provincial boards accept the degrees of Canadian Universities without examination. *Prince Edward Island* has as yet no Medical Board. In most of the *West India Islands* a certificate of registration in one of the Provinces of the Dominion entitles the holder to practice.

In the *United States*, holders of Canadian degrees in medicine can practice without additional examination or study. In many of the States, Medical Boards now exist similar to those in our Provinces, and the degree must be registered before a license to practice can be obtained. The custom varies in different States.

In *Great Britain*, colonial or foreign degrees are not registerable, except in the case of the University of Melbourne, and of holders of colonial degrees prior to 1850. To enable a colonial graduate to register, the examination of one of the numerous Licensing Boards must be passed.

A Graduate in Medicine of an American College, in order to register in any of the Provinces in the Dominion, must, (a) unless the holder of an Academical Degree, pass the Matriculation examination of the provincial Board; (b) attend some one of the Medical Schools in order to complete the curriculum (four years) required by the Boards, and (c) pass the professional examinations.

EXAMINATION PAPERS—SESSION 1888-89.

MATRICULATION EXAMINATIONS.

LATIN.

Time allowed, 2 hours;

Examiner,..... H. ASPINWALL HOWE, M.A., LL.D.

NOTE.—Candidates may choose, in this Paper, between Cicero and Virgil.

1. Translate, *without unnecessary change of construction* :—

CICERO.

(A.) III. *ixi ego idem in senatu, cedem te optimatum contulisse in ante diem v. Kalendas Novembris, tum quum multi principes civitatis Roma non tam sui conservandi, quam tuorum consiliorum reprimendorum causa profugerunt. Num infitiari potes te illo ipso die, meis præsidiis, mea diligentia circumclusum, commoverse te contra rempublicam non potuisse, quum tu, discessu ceterorum, nostra tamen, qui remansissemus, cede contentum te esso dicebas? Quid? quum tute Preneste Kalendis ipsis Novembribus occupaturum nocturno impetu esse consideres, sensitine illam coloniam meo jussu præsidiis, custodiis vigiliisque esse muniam? Nihil agis, nihil moliris, nihil cogitas, quod ego non modo non andiam, sed etiam non videam planeque sentiam.*

(B.) XIII. *Hisco omnibus, Catilina, cum summa republicæ salute; cum tua peste ac pernicie, cumque eorum exitio, qui se tecum omni scelere parricidioque junxerunt, proficisciere ad impium bellum ac nefarium. Tum tu, Juppiter, qui hisdem, quibus haec urbs, auspiciis a Romulo es constitutus; quem Statorem hujus urbis atque imperii vere nominamus: hunc et hujus socios a tuis aris ceterisque templis, a tectis Urbis ac monib; a vita fortunisque civium omnium areebis, et homines bonorum initios, hostes patriæ, latrones Italie, scelerum fædere inter se ac nefaria societate coniunctos, eternis suppliis vivos mortuosque maetabis.*

IN CATILINAM, ORAT. I.

N.B.—*In order to pass, Candidates must show, by their answers to the following questions, that they know the Grammar of the language* :—

2. Parse and give the construction of each word of:—“a tectis Urbis ac monib; a vita fortunisque civium omnium areebis.”

3. Decline together, in both numbers, *illo ipso die*, and also *republicam*. Write out the tenses *potes* and *moliris*.

4. Give the principal parts of the verbs to which belong *contulisse*, *reprimendorum*, *confideres*, *proficisci*, *conjunctos*.

5. In the following:—

(a) In ante diem V *Kalendas Novembris*. What were respectively the Kalends, Nones and Ides, and why were they so called?

(b) Non tam *sui conservandi* causa. Explain this genitive construction.

(c) *Nostra tamen, qui remansissemus* cōde. What is the antecedent to *qui*?

6. Give the derivation of *pernicies*, *parricidium*, *tectum*, *monia*; and distinguish between *inimicus* and *hostes*; *scelus* and *nefas*.

VIRGIL.

• *Time allowed, 2 Hours.*

1. Translate, *without unnecessary change of construction* :—

(A.) *Talia flammatu secum dea corde volutans.*

*Nimborum in patriam, loca feta furentibus austris,
Æoliam venit. Hic vasto rex Æolus antro
Luctantes ventos tempestatesque sonoras
Imperio premat, ac vinculis et carcere frenat.
Illi indignantes magno cum murmure montis
Circum claustra fremunt: celsa scdet Æolus arce
Sceptra tenens, mollisque animos, et temperat iras.
Ni faciat, m te aria ac terras cœlumque profundum
Quippe ferant rapidi secum verrantque per auras.
Sed pater omnipotens speluncis abdidit atris,
Hoc m etuens: molemque et montes insuper altos
Imposuit, regemque dedit, qui fudero certo
Et premere, et laxas sciret dare jussus habenas.
Ad quem tum Juno supplex his vocibus usa est:*

ENEID, Bk. I., vss. 50-63.

(B.) *ipsa sed in somnis inhumati venit imago*

*Conjugis; ora modis attollens pallida miris.
Crudeles aras trajectaque pectora ferro
Nudavit, cœcumque domus scelus omne rotexit.
Tum celerare fugam patriaque excedere suadet,
Auxiliumque viae veteres tellure recludit
Thosauros, ignotum argenti pondus et auri.
His commota fugam Dido sociosque parabat.
Conveniunt, quibus aut odium crudele tyranni
Ant motus acer erat; naves, que forte paratæ,
Corripiunt, omerantque auro Portantur avari
Pygmalionis opes pelugo; dux femina facti.*

ENEID, Bk. I., vss. 353-364

N.B.—In order to pass, Candidates must show, by their answers to the following questions, that they know the Grammar of the language:—

2. Parse and give the construction of each word of:—"Nimborum in patrio, loca feta furentibus Austris, Eoliam venit."

3. Decline together, in both numbers, *ipsa imago*, and also *scelus omne*. Write out the tenses *reterit* and *reclndit*.

4. Give the principal parts of the verbs to which belong *sedet*, *mollit*, *imposit*, *trajecta*, *reterit*.

5. In the following:—

(a) Secum dea corde *volutans*. To what class of verbs does *voluto* belong? How are such verbs formed?

(b) *His rociibus usa est*. What case is this and why?

(c) *Auxiliumque viæ veteres.... Thesauros*. Distinguish between the two accusatives.

6. Give the derivation of *vinclum*, *clastrum*, *inhumatus*, *conjux*; and distinguish between *aer*, *ether*, *aura*; *socius* and *comes*.

ENGLISH.

Time allowed, $1\frac{1}{2}$ hour.

Examiner,..... H. ASPINWALL HOWE, M.A., LL.D.

1. Divide the following stanza into separate sentences, and say how they are related to one another:—

Blow, *blow* thou winter wind

Thou art not so unkind

As man's *ingratitude*:

Thy tooth is not so keen

Because thou *art not seen*,

Although thy breath *be rude*.

2. Parse the words indicated by *Italics* above.

3. How do you distinguish Prepositions, Conjunctions and Adverbs? Give examples of *But* used (a) as an adverb, (b) as a preposition, (c) as a conjunction.

4. In the sentence, "We *ought* to *own* that what we *own* is not our *own*," explain with reference to their origin the words italicized.

5. The words *a* and *the*, formerly called *Articles*, are now classed among *Adjectives*. Give reasons for and against this change.

6. Correct errors, where found, in the following sentences, and give reasons for such corrections:—

(a) I was going to have written him a letter.

(b) You may take either of the three.

(c) Having failed in this attempt, no further trial was made.

7. Define the terms *root*, *stem*, *compound*, *derivative*, *cognate*, as applied to words. Analyse and derive the following words, noticing the force of each component part:—*Hillock*, *particle*, *streamlet*, *strength*, *martyrdom*, *chronicle*, *viscount*. Distinguish between *indices* and *indexes*; *depository* and *depository*; *deprecate* and *depreciate*.

8. Write a short essay on “Memory.”

9. Write legibly and punctuate properly the passage for *Dictation* which will be read to you.

GEOMETRY.

Time allowed, 1½ hour.

Examiner,..... H. ASPINWALL HOWE, M.A., LL.D.

1. If at a point in a straight line two other straight lines on opposite sides of it make the adjacent angles together equal to two right angles, these two straight lines shall be in one and the same straight line, Prop. 14, Bk. I.

2. If a side of a triangle be produced, the exterior angle is equal to the two interior and opposite angles, and the three interior angles of every triangle are together equal to two right angles. Prop. 32, Bk. I.

3. Describe a parallelogram which shall be equal to a given rectilineal figure, and have an angle equal to a given rectilineal angle. Prop. 45, Bk. I.

4. If a straight line be divided into two equal and also into two unequal parts, the rectangle under the unequal parts together with the square on the line between the points of section shall be equal to the square on half the bisected line. Prop. 5, Bk. II.

5. Shew from the preceding that the rectangle under the sum and difference of two lines is equal to the difference of their squares.

NATURAL PHILOSOPHY.

Time allowed, 1½ hour.

1. Shew that as the angle between two forces increases, the resultant is diminished. Two forces, 5 and 11, act on a point at right angles to one another; find the magnitude of the resultant.

2. Give examples of bodies in *stable*, *unstable*, and *neutral* equilibrium. If a body be in stable equilibrium, how is its centre of gravity affected by a small displacement of the body?

3. A carriage is being drawn by a rope up a smooth incline; if the rope breaks, why will the carriage continue to move up the incline for some distance? What considerations will determine this distance?

4. Describe an experiment shewing that the pressure of water at any depth below the surface is exerted upwards as well as downwards.

5. Explain the phenomenon of *ebullition*. Why is it that all liquids do not boil at the same temperature, and why is the boiling point not always the same for the same liquid?

BRITISH HISTORY.

Time allowed, 1½ hour.

Examiner, H. ASPINWALL HOWE, M.A., LL.D.

1. Who were the Normans? What was their original home? In what respects was the Norman Conquest beneficial to England?

2. Name those sovereigns of England in whose reign political freedom made greatest advances. State circumstances.

3. What were the causes that drove the Scotch into rebellion in the reign of Charles I.?

4. Account for the population of the North of Ireland being mainly Protestant, and that of the South and West, Roman Catholic.

5. In what wars has England been engaged since the accession of Queen Victoria, and with what results?

6. Write brief notes about the following persons and places, mentioning historical events connected with each:—Margaret of Anjou, John Knox, The Regent Murray, Titus Oates, Marlborough; Bretigni, Flodden, Glen-coe, Vittoria, Cawnpore.

GEOGRAPHY.

Time allowed, 1½ hour.

1. Describe geographically the voyage, by water throughout, from Liverpool to Chicago.

2. Draw a sketch map of South Africa, outlining the different States. Describe the region briefly. Name those parts which belong to Britain.

3. What countries border on the Baltic Sea, the Black Sea, and the Caspian? What rivers discharge into these respectively?

4. What regions of the Earth are rainless, or nearly so, and which have an excess of rain? Explain the cause of this difference.

5. What and where are Simoa, Oude, Bombay, Darien, Prague, Altai, Caso, Borneo, Baikul, Obi?

CHEMISTRY.

*Time allowed, 1½ hour.**Examiner,..... H. ASPINWALL HOWE, M.A., LL.D.*

1. What is *superphosphate of lime*, and how is it prepared?
 2. Outline the process by which *Sulphuric Acid* is prepared.
 3. Explain meanings of endings *ic* and *ous* in the names of acids, and endings *ite* and *ate* in names of salts.
 4. What is the composition of "white arsenic" of the shops? How may arsenic be detected in Solution?
 5. Describe mode of preparation and properties of either *perchloride* or *nitrate* of iron.
-

BOTANY.

Time allowed, 1½ hour.

1. Give botanical names for structures represented by *onion*, *potato*, *tomato*, *thistle down*, *flower of calla lily*.
 2. Sketch a leaf designated as *round-heart-shaped*, *crenate*, *long-petiolated*.
 3. What is *placenta* of the *orary*? Distinguish between *axile* and *parietal placenta*.
 4. Characterize *Gymnospermous* plants, citing an example from Canadian trees.
 5. Plants are said to purify the air for animals. Explain this statement.
-

ARITHMETIC.

*Time allowed, 1½ hour.**Examiner,..... H. ASPINWALL HOWE, M.A., LL.D.*

NOTE.—The *work* must be given by which answers are obtained, in both the Arithmetic and the Algebra.

1. The value of a fraction is not changed when the numerator and denominator are multiplied or divided by the same number. Shew this by reasoning with an example.
2. Add together $\frac{1}{5}$, $\frac{2}{3}$, $\frac{1}{4}$, and $\frac{1}{2}$. Then find what fraction the sum is of $1\frac{2}{3}$ of $\frac{4}{2\frac{1}{2}}$.
3. What is a decimal fraction, and why so called? How many times can .027 be taken from 3.33, and what fraction of the former of these two is the remainder?

4. If £240 maintain 49 persons in bread for 20 months, when wheat is 48 shillings a quarter, how long will £234 supply 91 persons with bread when wheat is 56 shillings a quarter.

5. How many yards long is the side of a square which contains $2\frac{1}{2}$ acres of ground?

ALGEBRA.

Time allowed, 1½ hour.

1. If $x = 1$, $y = -2$, $z = 3$, what is the numerical value of

$$\frac{1}{2} [x - \frac{1}{3} \{y - \frac{1}{4} (z - x - 2y)\}]$$

2. Subtract $2a - 3(2b - 3c)$ from $4a - 3(b - 2a)$ and multiply $a^2 - ab + b^2$ by $a^2 + ab + b^2$.

$$3. \text{ Show that } 1 - \frac{b^2 - c^2 + a^2}{2ab} = \frac{(a + c - b)(b + c - a)}{2ab}.$$

4. Solve the simultaneous equation

$$\left\{ \begin{array}{l} \frac{x}{a} + \frac{y}{b} = 2 \\ bx - ay = 0 \end{array} \right\}$$

5. The denominator of a certain fraction exceeds the numerator by 2. If the numerator of the fraction be increased by 5, the value of the fraction will be increased by unity. Find the fraction.

GREEK.

Time allowed, 1½ hours.

NOTE.—Candidates may choose, in this Paper, between Xenophon and Homer.

XENOPHION.

1. Translate, without unnecessary change of construction:—

Τοῦ ἐθναγῆτον καὶ ποιεῖται τοῦτο τοῖς ἵπποις, γραμμῇ ἐπιστολῇ παρὰ
τοῦτον ἢ τοῦτον ἵππον ἢ τοῦτον ὃς ἀν διηγεῖται πλειστονε, ἀλλὰ γράμματα τοῖς αἴτοι
τοῖς τοῦτον ἵππον αἴτοιν ἢ τοῦτον ἵππον γράμματα. Ἐντὸς δὲ τοῦ τοῦ ἐπιστολῆς καὶ τῆς
τοῦτον ἵππον γράμματα καὶ πιστίων. Ταῦτην ἐπιστολὴν διδωσει πιστῇ ἀνδρὶ,
εἰς τοῦ ἵππον ἵππον Κέρον διδωσει. Λαγανῷ δὲ αἴτῳ ὁ Κέρος συνθαμβάνει
τοῖς τοῦτον ἵππον τοῖς τοῦτον αἴτοιν τοῖς τοῦτον αἴτοιν Ηπειρον τοῦτον ἀριστον τῶν περι αἴτον
τοῖς τοῦτον τοῖς τοῦτον Ηπειρον αριστον τοῖς τοῦτον αἴτοιν ἀγαθον, τοῖς τοῦτον δέ
τοῖς τοῦτον τοῖς τοῦτον αἴτοιν τοῖς τοῦτον αἴτοιν. Οἱ δὲ ταῦτα ἐπισημαν, αγαθοντες ἀλε
τοῦν τοῦτον τοῖς τοῦτον αἴτοιν. Κέραμον δὲ καὶ τοῦτο παρακαλεῖσι σιρβανόν, ὃς γε καὶ αἴτῳ
τοῖς τοῦτον τοῖς τοῦτον ποιεῖται πιστίστα τοῦτον Ηπειρον. Ἐπεὶ δὲ ἵππον
τοῖς τοῦτον τοῖς τοῦτον ποιεῖται πιστίστα τοῦτον Ηπειρον ἀλλὰ παπόρρυπτον γένεται
τοῖς τοῦτον τοῖς τοῦτον ποιεῖται πιστίστα τοῦτον Ηπειρον ἀλλὰ παπόρρυπτον γένεται

2. Parse fully each word of:— *Tai την τὴν ἐπιστολὴν.* διδωσι πιστῶ ἀνδρὶ ὡς ὁετοῦ.

3. Decline together, in the three numbers, πιστῶ ἀνδρῷ; and write out in full the tenses διδωσι and παρεκάλεσε.

4. Give in the Indicative mood, the 1st person sing. of the Present, the Future, the Perfect, and the 1st or 2nd Aorist of the verbs to which belong διδωσι, ἀναγνοῖς, συνάμβανε, θίσθαι, ἐζῆσεν.

5. In the following:—

(a) ὅτι ἵξει ἐχων ἐπειγ.... In what mood is *ἵξει*, and why?

(b) ἐπειγ ὡς ἀν δινηται πλειστον. Give the corresponding Latin.

(c) προτιμηθεναι μάλιστα. Give the Comparative and Superlative of this adverb.

6. What is the derivation of:— *ἐπιστολὴ*, *ἐπιστημα*, *σπαστῆσε*, *κοίσει*, *ἀπόρρητος*.

HOMER.

Time allowed, $1\frac{1}{2}$ hour.

1. Translate, without unnecessary change of construction:—

Οὐ γὰρ πάντων ἔμεν ἀμῆς θρόνος οὐδὲ οὐα γίρνει.

Αλλὰ γένοστι ἴμιμικτο, πολίκλητο δὲ ισαν ἀνδονει.

Ωρσε δὲ τοῖς μὲν Ἀρμε, τοῖς δὲ γένακοπει τάσσεται.

Δεῖμος τοι δέδεος καὶ ἵρις ἀποτον ιππιανα.

Ἄρτος ἀνδροσανοι καστρητη ἐπάρη τε.

Πι τοι δέδηγ μὲν πρώτα κορίσσεται, αἱ τάρη ἐπιτε-

ούρανοι στηρησε κύρη καὶ τοι δέδηγ μένεται.

Πι σφιν καὶ τότε τείκον ὄνοιον ιμβάζει μεσσα.

Ἐρχομένη καθ' οὐδίλον, δούλονται σάπιον ἀνδονι.

Οὐ δέδηγ δέδηγ τε λόρον ινα ζενιόντεις τοντο,

Σιν ροι δέδηγ μένεται καὶ αιτει ἀνδρῶν

Χαλκοδαρέκωνται ἀπόρη μάστιξ ὄνοδον σεσαι.

Ἐπέληγεται δέδηγ γει πολίτης δέδηγ μάστιξ οὐράνται.

Ἐρθα δέδηγ οὐδιαγή τε καὶ τοι γάρη πιθετον ἀνδρῶν

Οὐδέντων τε καὶ δέδηγ μένεται, δέδηγ σιμπατε γανται.

ILIADE, BK. IV., vss. 437-451.

2. Parse fully each word of the line:—

οὐ δέδηγ δέδηγ τε γάρη πια ζενιόντεις μοττο,

3. Decline together in the three numbers, *πολίκλητο ἀνδρον*; and write out in full the tenses *ιμβάζει* and *ικαντο*.

4. Give, in the Indicative mood, the 1st pers. sing. of the Present, the Future, the Perfect, and the 1st or 2nd Aorist of the verbs to which belong *ιμιμικτο*, *ζαγιτ*, *ιμβάζει* and *ικαντο*.

5. Write the Attic forms of *ισαν*, *ἀνθρωπον*, *ιν λάζε*, *ἀπει*, *οισει*, *ιανα*.

6. What is the derivation of *πολίκλητο*, *ζενιόντεις*, *ἀνδρῶν*, *μοττο*, *οινωγή*.

FRENCH.

Time allowed 1½ hour.

Examiner, H. ASPINWALL HOWE, M.A., LL.D.

1. Translate, *without unnecessary change of construction* :—

(A) A peine affermi sur le trône, il tenta une entreprise plus difficile que des conquêtes. Les véritables tyrans de l'État étaient les évêques qui, ayant presque toutes les richesses de la Suède, s'en servaient pour opprimer les sujets, et pour faire la guerre aux rois. Cette puissance était d'autant plus terrible que l'ignorance des peuples l'avait rendu sacrée. Il punit la religion catholique des attentats de ses ministres : en moins de deux ans il rendit la Suède luthérienne, par la supériorité de sa politique plus encore que par autorité. Ayant ainsi conquis ce royaume, comme il le disait, sur les Danois et sur le clergé, il régna heureux et absolu jusqu'à l'âge de soixante-et-dix ans, et mourut plein de gloire, laissant sur le trône sa famille et sa religion.

(B) Les Russes sont robustes, infatigables, peut-être aussi courageux que les Suédois ; mais c'est au temps à aguerrir les troupes, et à la discipline à les rendre invincibles. Les seuls régiments dont on put espérer quelque chose étaient commandés par des officiers allemands ; mais ils étaient en petit nombre ; le reste était des barbares arrachés à leurs forêts, couverts de peaux de bêtes sauvages, les uns armés de flèches, les autres de massues : peu avaient des fusils, aucun n'avait vu un siège régulier ; il n'y avait pas un bon canonier dans toute l'armée.

2. Parse the words of the first sentence of extract A.

3. *Ayant presque toutes les richesses.* When does the Present Participle of a Verb in French change for gender or number ? Are *ayant* and *étant* subject to such change ? Why or why not ?

4. *L'avaient rendue sacrée.* Why are these Participles feminine ? Give Rule for it.

5. Mais ils étaient en *petit* nombre. Give the comparative and the Superlative of this adjective, and distinguish it from *peu*.

6. Et *mourut* plein de gloire. Write out the Present Indic. of this verb. Give also the Present Infinitive and the Present and Past Participles.

PROFESSIONAL EXAMINATIONS.

FIRST YEAR.

BOTANY.

Examiner, D. P. PENHALLOW, B.Sc.

1. Explain the structure of the ovum and spermatozoids, show in what they are produced, and compare their development in Pteridophytes and Angiosperms.
 2. Explain the conditions essential to, and the products formed by, constructive metabolism.
 3. Explain the difference between Chlorophytes and Saprophytes with reference to the appropriation of food and the metabolic products.
 4. A tree is punctured and water is observed to flow from the opening. Show fully the cause of such movements, its relation to growth, and how it may be measured.
 5. Show what elements constitute plant food, and how their value in this respect may be proved.
 6. Give a statement of the conditions which determine the temperature of plants, and show to what extent the temperature produced in respiration is a factor.
-

HISTOLOGY.

Examiner, PROF. G. WILKINS, M.D.

1. *Describe the crystals that may be obtained from blood. How can they be shown under the microscope?*
2. *Describe the glands opening into the mouth and how the different varieties may be distinguished from one another.*
3. *Describe minutely the structure of the kidney.*
4. *Describe the retina.*

PHYSIOLOGY.

Examiner T. WESLEY MILLS, M.A., M.D.

1. Compare, physiologically, plants and animals.
 2. The circulation of the blood in mammals: (a) nature; (b) causes.
 3. (a) Classify the fool-stuff's of a meal consisting of beef-steak, potatoes, bread and apple-pie.
(b) State how and where these are digested.
 4. The lungs: (a) structure; (b) functions and the relations of the latter to the former.
 5. Compare anatomically and physiologically the spinal cord and the brain.
 6. Describe the series of processes involved in "seeing" an object and describe the anatomical structures involved.
-

SECOND YEAR.

ANATOMY.

Examiner PROF. SHEPHERD, M.D.

- (1) Name in proper order the various structures it is necessary to remove to expose the Hip-joint from in front.
- (2) The Brain having been removed from the skull, describe the dissection necessary to expose the Third Ventricle. What are the boundaries of this ventricle?
- (3) Give a short account of the Intrinsic Muscles of the Larynx, mentioning their actions, attachments, and nervous supply.
- (4) Course and distribution of the Occipital Nerves and Artery.
- (5) Stomach: Situation, relations, vascular and nervous supply.
- (6) Describe the attachments, actions, vascular and nervous supply of the muscles in relation with the capsule of the Shoulder Joint.

PHYSIOLOGY.

Examiner..... WESLEY MILLS, M.A., M.D.

1. Write on one page of foolscap paper 20 statements of fundamental importance in animal physiology.
2. Blood capillaries, lymphatics, blood, lymph and chyle. (a) Structure; (b) general chemical composition of the last three; (c) functional relations of all of them.
3. A man on running 200 yards to catch a street car after dinner has the following experiences: (a) Greatly accelerated pulse and respiration; (b) sense of increased warmth, with profuse perspiration; (c) imperfect digestion; (d) inability to work mentally as usual.

Explain the causes and relations of these phenomena.

4. What are the principal waste-products of the animal organism (mammal)? To what in the *ingesta* do they correspond? By what organs are they excreted? Explain the relations of the latter to each other.
5. What are the views usually taught in regard to "absorption" from the alimentary canal? Criticise them.
6. Discuss the relations of the cerebral cortex to the rest of the nervous system; and the general relations of the latter to the various vital processes.
7. Show that all the senses are subject to the same general laws, illustrating especially by vision.
8. Explain, as time permits, how embryology bears on physiology.

CHEMISTRY.

Examiner..... G. P. GIRDWOOD, M.D.

1. The specific gravity of a sample of wax is 0.96: the weight of a piece is 15.432 grains. Describe the mode of taking the specific gravity thereof. What weight of lead of specific gravity 11.36 would be required?
2. Given any quantity of Zn, K, H, Cl, and O, how would you proceed to obtain Zinc Hydrate? Describe the operation and show by equations the steps necessary.
3. Describe the properties of Phosphorus and calculate the weight of 1 litre of phosphorus vapor at 400°C., normal pressure.
4. Compare fully the modes of preparation and properties of Carbon Dioxide and Sulphurous Anhydride.

5. How are Sulphur and Nitrogen distributed in nature? How may these elements be detected in organic compounds?

6. Give a brief account of the chemistry of the acids of Sulphur and Boron.

7. Arsenic and Antimony have properties and reactions which show that they are intermediate between the metallic and non-metallic elements. Discuss this fully.

8. Two substances each yield the following results to analysis: Carbon, 24.24 per cent.; Chlorine, 71.72 per cent.; Hydrogen, 4.04 per cent.; Vapor density (air = 1) = 3.43. Give the formulae and state how each may be prepared.

9. Classify (a) the Carbohydrates and (b) the Cyanides. Give the characteristics of each sub-group.

10. Describe two reactions that may be used to detect each of the following: (a) Prusic Acid; (b) Carbolic Acid; (c) Urea; (d) Ethyl Alcohol; (e) Oxalic Acid; (f) Acetic Acid; (g) Chloral Hydrate; (h) Mercuric Chloride; (i) Arsenious Oxide; (j) Lead Nitrate. Give equations wherever possible.

CHEMISTRY.

SUTHERLAND GOLD MEDAL.

Examiner,..... PROF. G. P. GIRDWOOD, M.D.

1. Show the relation existing between the three agencies, light, heat, and electricity.

2. Give examples showing that mechanical division increases chemical activity.

3. The properties of the elements vary with their atomic weights; illustrate this.

4. Discuss the physical properties of the class of elements called metals. How is the atomic weight of a metal determined? How could you separate Ag, Hg, Cd, Fe, Zn, Ca and Mg, if present in the same solution.

5. How many litres of HCl gas at 0° C. and 760 m.m. are required to precipitate all the silver contained in a solution containing 340 grammes of silver nitrate? If 500 C. C. of Cl at normal pressure and temp. are passed through ammonia in excess, and assuming all the Cl to be utilized, how many C. C. of N. will be liberated? How could you determine the formula of ammonia from these facts?

6. Show how the classes of organic compounds Alcohols, Ethers, Halogen Ethers and Mercaptans may be formed, and the relation which

exists between these and the organic compounds called amines, their classification and mode of formation.

7. Write an account of the chemistry of glycerine and its chief derivatives.

8. Prove the formula for urea; by what reactions might it be prepared from ethyl alcohol.

9. Write a short essay on the chemistry of either (a) the urine, (b) digestion, or (c) respiration.

10. Give two methods for the preparation of each of the following: Oxalic acid, acetamide, ethylamine, diethylketone, and butyric acid.

THIRD YEAR.

PATHOLOGY.

Examiner T. WESLEY MILLS, M.A., M.D.

1. Enumerate abnormalities in blood-distribution and describe two of them.

2. Inflammation: (a) Phenomena. (b) Causes and relations. (c) Various modes of termination.

3. What various forms of tissue degeneration are generally recognized? Connect them by common features anatomical and pathological.

4. In the case of four dogs exposed to an infectious disease caused by a micro-organism, the following were the results: (a) One dog that had previously had the disease escaped a second attack; (b) one suffered little apparent diminution of vitality; (c) one escaped wholly; (d) one died. Discuss the above in the light of the pathology of the present.

5. Write as time permits on Tumors.

MEDICAL JURISPRUDENCE.

Examiner PROF. WILKINS.

1. What do you understand by the term *cadaveric ecchymoses*? Explain their formation and where found; also their importance medico-legally. How would you distinguish them from bruises inflicted during life?

2. Explain the objections to the hydrostatic test of live birth.

3. Give some of the important symptoms of lead poisoning. Explain their absence in drinking river water, although conveyed through leaden pipes.

4. Describe General Paresis of the insane.

PHARMACOLOGY AND THERAPEUTICS

Examiner, PROF. JAMES STEWART, M.D.

1. Describe fully how the process of digestion may be influenced by alcohol, opium, quinine, strychnine, bicarbonate of potassium and hydrochloric acid—
(a) In small doses.
(b) In large doses.

2. Take any drug that has a distinct action when (a) applied locally to the skin or mucous membrane; (b) when absorbed into the blood; and (c) while being eliminated. Describe fully such action as the agent you choose may be possessed of, and write a prescription (metric system) for any use that can be made of—

- (a) Its direct local action.
 - (b) Its internal action.
 - (c) Its remote local action.

3. In sleeplessness, the following agents have been shown to be of value, viz, Strychnine, Opium, Sulphonal and Electricity. Explain their mode of action and point out in what particular forms of sleeplessness are they indicated.

How should they be administered?

4. Give a sketch of the dietetic treatment of Diabetes Mellitus and Acute Bright's Disease. Explain the reasons for adopting the form of diet you recommend.
 5. In what conditions may stimulants of the respiratory centre prove useful? Write prescriptions for the uses you mention.
 6. Explain the mode of action of alcohol, cold water and antipyrine in fever.

M.D. C.M., FINAL EXAMINATION.

PRINCIPLES AND PRACTICE OF SURGERY.

Examiners PROF. G. E. FENWICK, M.D.
PROF. F. BULLER, M.D., M.R.C.S.E.

1. To ligature the right common Carotid Artery, mention the structures to be cut through, the part of the vessel usually selected for the application of the ligature, and the relative position of contiguous structures to be avoided.

2. Trace the anterior Tibial Artery from its origin downwards. In a wound of the vessel in the middle third of the leg, what structures would

guide you in your search for it and how would you arrest the hemorrhage?

3. Trace the descent of the bowel in Femoral Hernia. What structures does it acquire as its coverings? Where is the stricture situated in cases of strangulation, and what are the dangers to be avoided?

4. Mention the anatomical division of the Male Urethra. Describe the origin of stricture of this natural passage, and state where it is most commonly found.

5. Describe the dangers of Lateral Lithotomy and how they are to be avoided.

6. Dislocation of the first phalanx of the thumb backwards, what gives rise to the difficulty in its reduction?

7. At what period of their course may Burns prove fatal? Describe the causes of the fatality in each stage.

8. What is the object of carefully observing the temperature in patients after surgical operations?

What might a sudden rise or a marked fall in the temperature of the body indicate?

8. Describe an ordinary case of Sympathetic Ophthalmia, and state what you know concerning the causes, prevention, and treatment of this disease.

10. Chronic Suppurative Otitis Media? State what you know of the dangers, complications, and treatment of this affection.

THEORY AND PRACTICE OF MEDICINE.

Examiner..... Prof. R. P. Howard, M.D.

1. The diagnosis between Acute Articular Rheumatism and the diseases which may be confounded with it.

2. Describe the treatment of a severe case of Typhoid fever, attended with delirium and diarrhea.

3. Enumerate the affections of the brain, heart, blood-vessels and eye which may result from chronic Bright's disease, and explain their production.

4. The forms of Acute Phthisis and the symptoms and signs indicative of each form?

5. Prescribe the dietetic and hygienic treatment of Gout, Diabetes Mellitus, and Chronic Interstitial Nephritis.

6. Relate the early symptoms suggestive of Tabes Dorsalis, Rickets, and Diabetes Mellitus.

7. Describe the morbid anatomy of Cerebral Syphilis and of Rheumatoid Arthritis.

8. The symptoms and course of acute yellow atrophy of the liver? The peculiarities of the urine in it?

9. The causes, clinical diagnosis and several consequences of Mitral Regurgitation?

10. An infant, while in its usual health, is suddenly seized with fever vomiting, stupor and convulsions, which last two days, and then these symptoms gradually disappear, leaving the child aphasic and hemiplegic. What is the probable nature of the affection, and what evidences of the illness will be likely to exist a year later? What will be the condition of the paralyzed limbs then?

GYN.ECOLOGY.

Examiner..... PROF. W. GARDNER, M.D.

1. Retroversion and Inversion of the Uterus? Symptoms, physical signs and diagnosis?

2. Reflex and Systemic disturbances attendant on Chronic Metritis?

3. Myoma Uteri? Varieties, symptoms and physical signs?

4. Ovarian Tumors? Symptoms and the more common complications and accidents?

OBSTETRICS AND DISEASES OF INFANCY.

Examiner..... PROF. J. C. CAMERON, M.D.

1. Describe fully the management of the *third stage* of labor, giving your reasons for the various manœuvres recommended.

2. When is the *premature induction of labor* indicated? What are the relative merits of the methods proposed by Krause, Cohen, Kirvisch, and Barnes?

3. How would you perform *combined pelvic version*, and when would you prefer this to the *high forceps* operation?

4. During gestation a primipara suffers considerably from nausea, loss of appetite, constipation and palpitation. Labor is tedious and several vaginal abrasions occur, together with laceration of the perineum to the second degree. Convalescence proceeds favorably till the evening of the third day, when there is a severe chill with rise of pulse and temperature. Describe fully your treatment of such a case.

5. How would you treat—(a) Umbilical hemorrhage?

(b) Congenital hernia?

(c) Talipes equino-varus in an infant?

WYETH'S SPECIALTIES.

✧ MEDICINAL FLUID EXTRACTS. ✧

Our list of **FLUID EXTRACTS** embraces not only those official in our *Pharmacopœa*, but also those whose therapeutical value has induced their use among physicians.

Our many years' experience as practical pharmacists, thorough knowledge of the character and properties of each drug, together with appliances for manufacturing (which for completeness and economy of working, cannot be excelled), enable us to produce a line of Fluid Extracts of unsurpassed purity, activity and reliability. We ask for them the most critical and careful examination and comparison, claiming, as we do, their superiority over almost all other similar preparations in the market. We feel confident our claims will be sustained by any unprejudiced and experienced druggist.

Every detail of their manufacture, from the crude drug to the completion of the operation, is based upon the most extended and intelligent knowledge of the characteristics of each drug.

SOLUBLE COMPRESSED HYPODERMIC TABLETS.

We claim for our Hypodermic Tablets: Absolute accuracy of dose: Ready and entire solubility; Perfect preservation of the drug. Their convenience and utility will at once be apparent on examination.

NOTE.—For convenience in ordering, it will only be necessary to specify the Numbers on our price list.

They are put up in cylindrical tubes, convenient for carrying in hypodermic or pocket cases, each tube containing twenty tablets, ten tubes, or two hundred tablets in a case.

We also furnish neat leather pocket cases holding ten tubes, with space for Hypodermic Syringe and Needles. These can be filled with any kinds on the list that may be required (price, \$1.00 for the empty case), with name and address printed on case in gold letters, and the list price added for the tubes ordered to fill case. They will be sent by mail, postage paid, on receipt of the price, by addressing the

DAVIS & LAWRENCE COMPANY, Limited, MONTREAL,

General Agents for the Dominion.

NOTICES OF MEDICAL JOURNALS: *From the Lancet Analytical Records.*—“Fellow's Syrup contains the hypophosphites of iron, quinine, strychnia, manganese, lime and potash—the strychnia amounting in a dose of one drachm to one sixty-fourth of a grain. The preparation therefore includes a number of powerful nervous tonics. The reaction of the preparation is practically neutral—an advantage in many cases where the acid solutions of quinine and iron are objectionable, or inadmissible. The compound is skillfully prepared, and the difficulties of keeping the remedies which it contains in solution, and in a form in which they are not liable to change, have been very successfully overcome.”

FELLOW'S HYPOPHOSPHITES.

Specific Effects and Instructions for Use.

TO STIMULATE THE APPETITE.—Take half the Tonic Dose, as directed, in very cold (not iced) water, fifteen minutes before eating.

TO STIMULATE DIGESTION AND ASSIMILATION.—Take the remaining half of the Tonic Dose, during meal time, in water.

TO INCREASE RAPIDLY IN WEIGHT.—Take the Tonic Dose, as directed, and adopt the free use of new milk in addition to the regular food.

TO SUSTAIN MENTAL EXERTION.—Mix two teaspoonfuls in a tumblerful of cold water, and drink small quantities occasionally during the hours of intellectual work.

TO GIVE POWER TO THE VOCAL CHORDS.—Take the Tonic Dose fifteen minutes before singing or lecturing.

Where *mucous expectoration* is difficult, the Tonic Dose repeated every two hours will effect its removal with very little effort.

TO PREVENT RECURRENCE OF NIGHT SWEATS.—Take the Tonic Dose at each meal and at bed-time. The contractile power is imparted to the nerves, which are connected with the sweat-glands.

TO PREVENT SWEATING HANDS AND FEET.—Take the Tonic Dose as directed, avoid undue excitement, and occupy the mind with pleasant, unwearying pursuits.

For CONVALESCENCE from Typhoid and other low Fevers, and Debility from residence in hot or malarial localities, employ the Tonic Dose.

TO STRENGTHEN AND DEVELOP NURSING INFANTS.—Let the mother take the Tonic Dose as directed, with the food.

TO PROMOTE SLEEP.—Take the Tonic Dose before eating. This applies particularly to sufferers from shortness of breath.

NOTE.—In prescribing, please give prominence to the name Fellow, thus:

Syr: Hypophos: Fellow
and avoid disappointment.

CANADA TRUSS FACTORY,

Established 1856.

F. GROSS,

SURGICAL INSTRUMENT MAKER,

BEFORE USING **712 Craig Street, Montreal.** AFTER USING

Gross' Shoulder Brace and Improved Chest Expander.

THE DEAF MADE TO HEAR BY RHODES' PATENT AUDIPHONES.

RUPTURE.—GROSS' PATENT COMPOSITE RADICAL CURE TRUSS.

Also every other kind of Truss on hand or made to order. Elastic Stockings, Knee Caps, Anklets, Leggings, Thigh Pieces, etc.

A simple line drawing of a person's back and shoulders, facing right. The person has short, dark hair and is wearing a light-colored, short-sleeved shirt.

MONTREAL

The supplying of Physicians, Veterinary Surgeons, Hospitals and Public Institutions with Drugs, Chemicals and Pharmaceutical preparations of guaranteed strength, and of the finest quality, a specialty.

**The Dispensing of Physicians' Prescriptions entrusted
only to qualified clerks.**

Rare Chemicals Continually Added to Stock.

All the Oleates, Empty Gelatine Capsules, Hyoscyamine, Digitaline, Eserine, Cocaine, Muricate, Sparteine, Iodol, Urethane, etc.

SHARP & DOHME,

MANUFACTURING CHEMISTS,

Baltimore, Md., U. S. A.

Manufacturers of all the official and other standard

FLUID, SOLID AND POWDERED EXTRACTS,

Including all the NEW REMEDIES,

Pure Chemicals, Elixirs, Syrups, Dialysed Iron, Saccharated Pepsin, U. S. P., Granular Effervescent Salts, Compressed Tablets and Lozenges, Tablet Triturates.

PERFECTLY SOLUBLE

GELATINE COATED AND SUGAR COATED PILLS.

Comprising all the officinal and other well-known favorite formulae.

These Pills are all prepared with the utmost care, under our immediate supervision. The Drugs entering into their composition are of the best quality.

The quantities and properties are invariably as represented on the labels.

The excipients to make the masses are carefully chosen in each case to make the Pill permanently soluble in the fluids of the stomach and bowels.

The Sugar Coating and Gelatine Coating will be found very soluble, and not excelled by any other in point of beauty or finish.

Physicians will find our

PIL: LAPACTICÆ (S. & D's)

(Composition: Aloin $\frac{1}{2}$ gr., Ext. Bellad. $\frac{1}{2}$ gr., Strychnine 1-60 gr., Ipecac 1-16 gr.) recently introduced by us, an elegant and most efficient combination for the relief of Habitual Constipation, Atonic Dyspepsia, Biliary Engorgement, and Many Gastric Disorders.

~~xx~~ Samples furnished upon application.

We call special attention to our

SOLUBLE HYPODERMIC TABLETS.

These tablets are quickly and perfectly soluble in cold or warm water.

They combine accuracy of dose with perfect preservation of the active ingredient.

The base with which the latter is combined is perfectly harmless and unobjectionable. They will cause no abscesses.

They will not become insoluble by age.

They may also be administered by the mouth.

Catalogue, giving composition, doses, etc., of all our preparations, mailed to physicians on application.

GASTRIC DERANGEMENTS.

HORSFORD'S ACID PHOSPHATE

Unlike all other forms of phosphorus in combination, such as dilute phosphoric acid, glacial phosphoric acid, neutral phosphate of lime, hypophosphites, etc., the phosphates in this product are in solution, and readily assimilative by the system, and it not only causes no trouble with the digestive organs, but promotes in a marked degree their healthful action.

In certain forms of dyspepsia it acts as a specific.

DR. H. R. MERVILLE, Milwaukee, Wis., says: "I regard it as valuable in the treatment of gastric derangements affecting digestion."

DR. E. OSBORNE, Mason City, Ia., says: "I consider it a valuable addition to the remedies in use for the relief of gastric disorders dependent on enervation."

DR. ALBERT DAY, Superintendent of the Washington Home, Boston, says: "For several years I have used it in cases of alcoholism and acute gastric irritation. It is of special value."

DR. T. G. COMSTOCK, of the Good Samaritan Hospital, St. Louis, says: "For some years we have used it in a variety of derangements characterized by debility, as also in chronic gastric ailments. It is approved of unanimously, by the medical staff of this hospital."

DR. G. W. WHITNEY, Marshall, Minn., says: "I have used it in debility of the nervous system, and deranged condition of all the secretory organs. I esteem it highly."

Send for descriptive circular. Physicians who wish to test it will be furnished a bottle on application, without expense, except express charges.

Prepared under the direction of PROF. E. N. HORSFORD, by the
Rumford Chemical Works, - Providence, R. I.

BEWARE OF SUBSTITUTES AND IMITATIONS.

**CAUTION.—Be sure the word "Horsford's" is printed on the label.
All others are spurious. Never sold in bulk.**

THE
VIBURNUM COMPOUND
OF DR. HAYDEN

Is indicated in those complaints peculiar to

WOMEN,

And will commend itself to every intelligent physician by its perfect safety, promptness of action, and the results obtained by its employment without sequelæ.

The **VIBURNUM COMPOUND** ACTS IN ALL CASES AS A TONIC, without inducing spasms, establishing an equilibrium in the system which constitutes HEALTH, or normal action,—a whole volume of words cannot express more.

— THE FORMULA OF —

VIBURNUM COMPOUND

Was written in 1865, by William R. Hayden, M. D., of 42 Irving Place, New York City, and has consequently been before the profession for **Twenty-three Years**, and has received the warmest commendations from them. We have published the testimonials of

FIVE THOUSAND PHYSICIANS IN ITS FAVOR.

The Viburnum Compound

Is employed in a large number of the principal Hospitals, and is prescribed by many of the most eminent medical men, and is in every way worthy the confidence of the profession, to whom alone it is presented.

For valuable eighty-page

ILLUSTRATIVE HAND-BOOK, FREE,

Containing Formulae, Special Directions, Report of Cases, and the testimonials of one thousand physicians.

PAPOID AND SODA TABLETS.

In order to have PROF. FINKLER's formula of Papoid and Soda Bicarb, in a convenient form, we have prepared Compressed Tablets, each containing:

Papoid Gr. i. Soda Bicarb. Gr. ii. Sae. Lacti qs.

Exact
Size of
Tablet.

PAPOID AND SODA TABLETS are recommended in preference to Pepsin, Lactopeptin, Pepsin Tablets, Wine of Pepsin, or any other remedy, for the following forms of Dyspepsia or Indigestion:—

Simple Loss of Appetite, Acid Dyspepsia,

Gastric or Intestinal Pain,

Cases of Ordinary Slow Digestion.

**Dyspepsia, or Chronic Catarrh of the Stomach,
due to Alcoholism.**

Heartburn and Flatulency.

Headache arising from Indigestion.

Dose:—1 to 3 after each meal, except in cases of Chronic Catarrh of the Stomach, when 1 or 2 should be taken before each meal.

If your Druggist has not got these Tablets, kindly ask him to write to his Wholesale Druggist, or to

THOMAS LEEMING & CO.,

Sole Agents for Canada,

MONTREAL.

READ THIS CAREFULLY.

Those who expect **Benefit** from taking **Meat Preparations** should understand that **Extracts of Meat** have **No Nutritious Properties**

Because

The **Albumen** and **Febrine**, which are nutritious elements of Meat

ARE INSOLUBLE

and cannot **exist in a clear liquor** that such as Extract of Meat makes, **The Sediment in**

JOHNSTON'S FLUID BEEF

contains the **Nutritious Constituents of Beef**.

Get rid of it, and the **clear liquor** that is left is only **Meat Flavour**.

THIS FACT has been **demonstrated again and again** by **Scientific Analysis**.

TO THE MEDICAL PROFESSION:
WYETH'S SPECIALTIES.

*Compressed Tablet Triturates, Compressed Pills,
Compressed Hypodermic Tablets.*

COMPRESSED COCAINE TABLETS AND LOZENGES,

FOR HAY FEVER, ROSE COLD, &c.

Wyeth's Peptonic Pills, Spencer's Chloramine Pastilles, Wyeth's Fluid Extracts, Elixirs, Wines and Syrups, Pure and Saccharated Pepsin, Dialysed Iron, Wyeth's Liquid Extract of Malt, Rubefacient and Anodyne Cones, Menthol Pencils,

MAY BE HAD OF ALL THE DRUG TRADE.

WYETH'S BEEF, IRON AND WINE.

EXTRACT OF BEEF, CITRATE OF IRON AND SHERRY WINE.

CAUTION.—We have reason to believe that our BEEF, IRON AND WINE is being imitated by some (not over scrupulous) Druggists of the Dominion of Canada. In some cases these imitations are put up in bottles similar to our own in style and appearance, having our labels copied verbatim, omitting only our name, so that purchasers might readily be deceived; it therefore becomes necessary for us to "caution" you, in ordering BEEF, IRON AND WINE, to be particular in specifying our make (WYETH'S), and in seeing that you get the genuine article made by us. This caution is also very necessary when buying BEEF, IRON AND WINE in smaller quantities than the original bottle, as we know other inferior makes are often substituted for our genuine article. We claim that the reputation for this medicine was created by our preparation, and we believe it is the one exclusively prescribed by our leading physicians.

In ordering, please specify "WYETH'S."

We will be glad to give quotations for Compressing Special Formulae of Lozenges, Triturates, Hypodermics, and Pills in quantities; and also for Sugar Coating and for Special Formulae Elixirs, Syrups, Fluid Extracts, &c. Price lists and other printed matter and Samples will be sent by mail on application.
